

ACTOUARIOUS Cancer Protocol ... an Integrative Dietary & Herbal Strategy for Successful Monitored Self-Treatment

*.... with BioEnergetic
Enhancement via
Pulsed Technologies*

**IMPORTANT
UPDATE 2-15-17**
(see Page 3)

On June 30th, 2012 an International Physicians Roundtable was hosted by Gus and Beverly Kotsanis at the Kotsanis Institute in Dallas/Ft Worth. Approximately 40 of today's leading innovators and specialists of many disciplines participated in this age-old, common sense and practical approach to one of today's biggest health problems.

Energy Supply (40,000 Hz)
Mind/Body/Spirit Mental Manipulation

ACTOUARIOUS Cancer Protocol ... an Integrative Dietary & Herbal Strategy for Successful Monitored Self- Treatment

IMPORTANT UPDATE:

The initial Actouarious Dietary & Herbal Cancer Protocol DRAFT was made publicly available and distributed shortly after the June, 2012 Physicians Roundtable. The Actouarious protocol itself by (Kotsanis/Agapiou/Kotsanis) was embedded within a larger document prepared by Pulsed Technologies (Holman/Dorneanu) which also included the protocol enhancement and support mechanisms intended to explain and provide significant delivery, uptake and utilization of the components of the protocol itself. Over the years, most questions and interest we have received has dealt with the physics of this enhanced delivery and utilization by electronic means and its application to other protocols.

At the request of the original Actouarious protocol developers, the original embedded protocol, has been REMOVED from this document. However, Pulsed Technologies' important "Enhancement and Support via Electronic Means" strategies section remains and is applicable to not simply the original Actouarious Protocol, but virtually any supplementation/delivery/utilization protocol including conventional allopathic strategies, especially those used when dealing with Cancer.

With that in mind, please consider the symbiotic and synergistic enhancement the electronic mechanisms may add to whatever strategy or protocol you may choose.

*Science is but a perversion of
itself unless it has, as its
ultimate goal the betterment
of humanity.*

*What we now want is closer
contact and better
understanding between
individuals and communities
all over the earth, and the
elimination of egoism and
pride ...*

*Peace can only come as a
natural consequence of
universal enlightenment.*

Nikola Tesla - 1919

The incredibly “logical” concepts/strategies of the Actouarious Cancer Protocol fall PERFECTLY in line with the concepts of bioenergetics and electro medicine. Even though we (Pulsed Technologies) are seemingly working from “electrical and physics” perspectives, these venues are in many ways identical to the underlying strategies revealed in the outlined protocol. In many ways, the underlying intents are the same, simply accomplished in different yet complementary manners.

As a member of the panel, I was continually reminded of something I read in my research several years ago after a trip to the Tesla museum in Serbia. Sometime in 1889, famed inventor Nikola Tesla became determined to enter into a systematic investigation with the electrical nature of the human body from an electro-therapeutic point of view. Throughout the 1890s and on into the early

1900s, Tesla spoke publicly about the therapeutic characteristics of high frequency, about the bodies amazing ability to inherently tolerate it, but most interesting of all, he spoke of the separation between those of science who were capable

of understanding the physical/electrical science and those in the biological research and practice of medicine. He identified the need then for close cooperation and communication of these distinctly separate fields before any practical use could be made from the underlying science. My how little has changed over the last century but THIS may be the TIME and PLACE for that change and cooperation to occur!!!

While it remained for the physician to investigate the specific actions on the organism and indicate proper methods of treatment, the various ways of applying these currents to the body of a patient suggested themselves readily to the electrician¹

Symbiotic/Synergistic Enhancement

During the weekend of the Actouarious roundtable, we identified 8 specific areas of symbiotic and/or synergistic strategic enhancement to the currently existing protocol with the most assured results to be **faster and/or more effective response and recovery**. I will briefly address these individual areas below. You will quickly realize the overlapping relationships AND the commonality with your strategy which can be used to mutual benefit and the assured accomplishment of our mutual goals.

1. **Enhanced Delivery** – electroporation is a natural and expected occurrence when provided direct or induced (inducted) micro current electrical charges. This allows the ion channels of the cell membrane to more easily and directly pass through the cell membrane, needed nutrients, oxygen, even medications where required. Much less medication can be provided the patient at less toxic doses (if toxic), because of the

¹ Tesla, Nikola, *High Frequency Oscillators for Electro-Therapeutic and Other Purposes* presentation to the American Electro-Therapeutic Association, Buffalo, NY, Sept 15, 1898

more efficient delivery mechanisms being accomplished.

2. **Manipulation of pH** – electron supply – raised pH - pH being a measure of “available electrons (from hydrogen). A large portion of the protocol relies heavily on consistent maintenance of elevated pH ... something we seem to be able to provide ... in localized areas almost instantly. Something not often mentioned, the related pain and swelling is an attribute of low pH and the lack of intercellular communication.
3. **Cellular Un-Clustering** – as cellular potential (voltage) raises, the clustered “sticky blood” separates. There is a clue here that the previously mentioned pH may be part of the mechanism that allows the structural breakup/dissolution of the specific cancer cells. [Important video is available which better illustrates these results] The video frames here, clearly shows how availability of oxygen, nutrients and medications can be quickly and easily increased with enhanced efficiency.

4. **Powering of metabolic functions** – the powering of metabolic functions and processes of the cells are provided “electrically” largely from stored energy from within the cell membrane as well as structured within the cell. These are CLEARLY electronic functions and structuresAMAZING!!!!

5. **Organ Support / Detoxification** - Almost ALL “our” users who use the equipment for biological treatment utilize a proprietary protocol that has been developed over time and has been reportedly quite successful in assisting the flushing out of toxins and targeted pathogens. The organ stimulation (kidneys, liver, etc.) is critical to remove as much toxic debris as possible both before and after any targeted “destructive” pathogen treatment.

6. **Colloidal Silver** - the PulsedTech equipment can also be used to prepare a high grade form of “frequency imprint-able” colloidal silver. (Note: This should not be confused with commercially available colloidal silver!) Every person has at least some degree of undesirable pathogens. Nano particle size silver clusters will readily attach to an enzyme (use for respiration) on the cell surface of most pathogens and undesirable bacteria effectively suffocating them, typically within minutes leaving the organism intact and able to be processed and eliminated via normal processes. The energy being robbed by those pathogens can better be expended on “other healing efforts”

7. **Energy supply (40,000 Hz)** – Related to #4, this may be incredibly useful especially during first steps when other materials are not consumed....only water. While helping raise the pH, the body and mind can still receive energy to carry on necessary processes. It could assist them in going still another day when they may not otherwise feel able OR it may be a substitute

8. **Mind/Body/Spirit - Mental Manipulation** – This is not really covered in any of the presentation materials you have been given, however the function generator we use, as well as some of our proprietary scripts are specifically designed for mental manipulation via brain-wave “entrainment”. Waveforms used in those cases are typically Sine and can be very precise.

Challenges and the Future

One of the great challenges faced is the fact that much of the electrical technology has largely been described only in “conventional” electromagnetic terminology. Frankly ...

The underlying physics I am working with is actually NOT conventional ... I DO KNOW vocabulary is wrong!!!

Tesla declared in 1919 that Hertzian thinking “has stifled creative effort in the wireless art and has retarded it for 25 years”
