Pulsed Technologies

July 2012

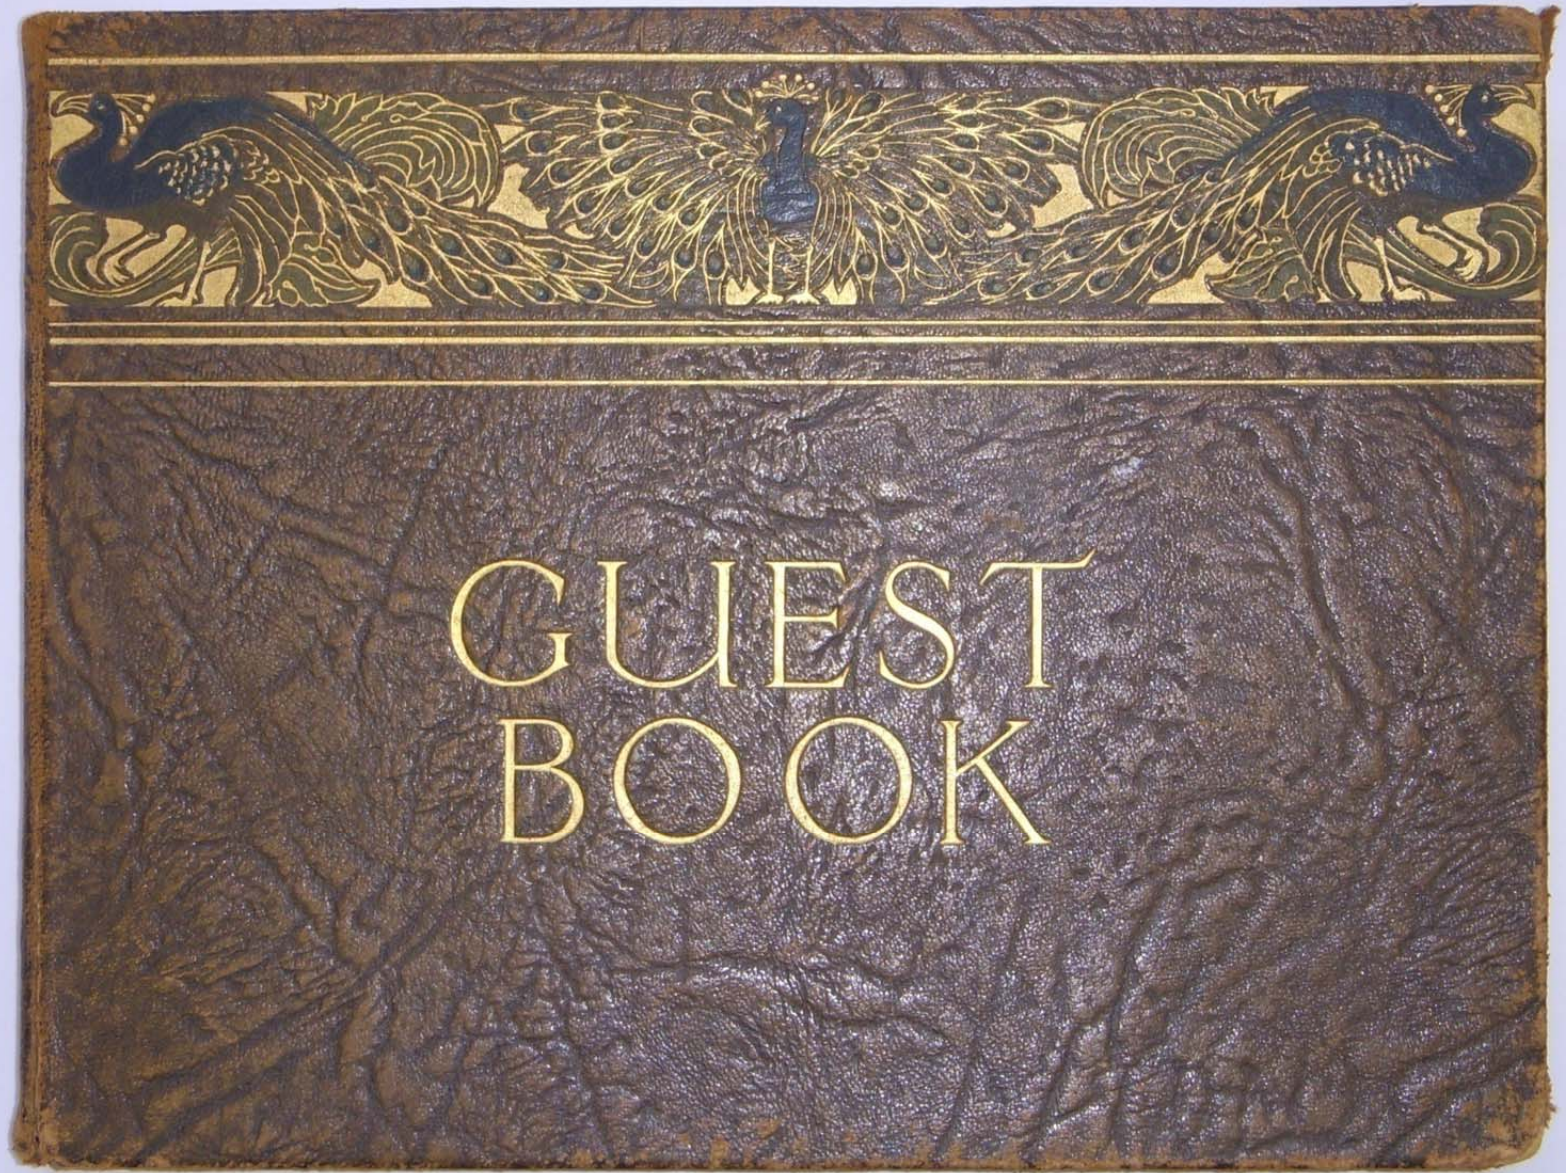

Many of the Rife Lab resources are beginning to emerge and can be of great value to the serious historical and technical researchers. The Guest Book maintained at all the Rife Lab locations gives an accurate and historical record of virtually all who visited the Rife Labs and were directly exposed to this fascinating technology and the humble gentleman himself.

The actual Guest Book pages are reproduced here in the following pages for your personal research and enjoyment.

(Also maintained with Rife's Guest Book are two personal photos of his #3 Universal Microscope)
