#### WHAT IS THE DIFFERENCE?

www.PulsedTechnologies.com www.PulsedTech.RO

#### It's THIS!!!

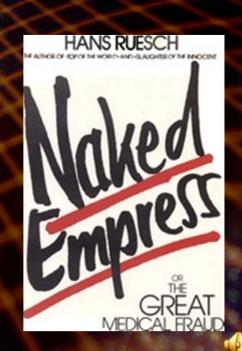

With Electro-medicine .... THIS largely goes away

#### Hans Ruesch

"Even the most independent newspapers are dependent on their press associations for their national news. And there is no reason for a news editor to suspect that a story cooking over the wires of the Associated Press, the United Press or the International News Service, is censored when it concerns health matters. Yet this is what happens constantly... The Journal of the American Medical Association (JAMA), the organ of the Medical Syndicate in the U.S., had bragged as far back as January 20, 1940, that the United Press had been induced to issue a directive requiring all articles on cures and human health to 'be cleared' through its New York bureau and 'science editors.'"

Hans Ruesch, 1982, Naked Empress p102

The Science of Phototherapy

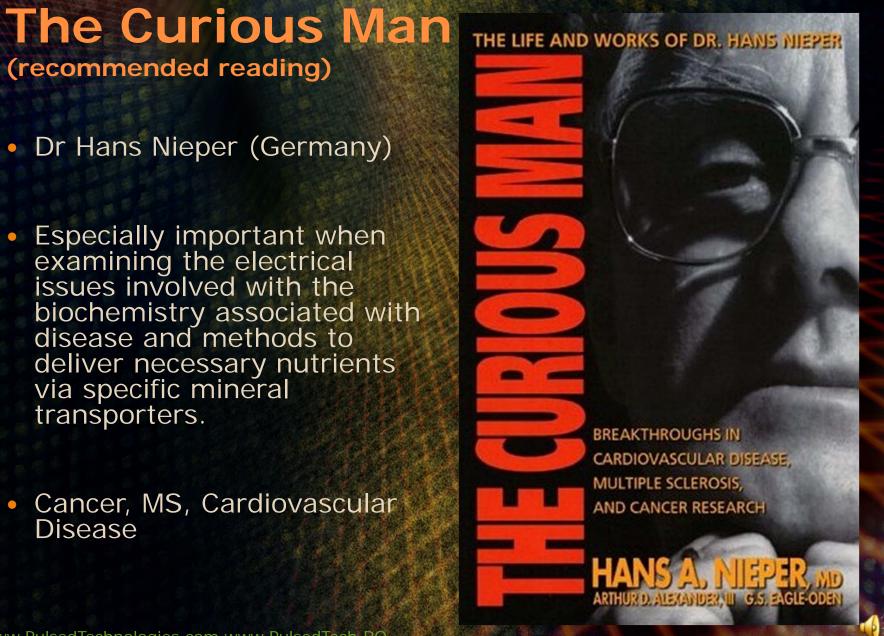

Steve Haltiwanger. M.D., C.C.N

- Dr. Haltiwanger has several detailed presentations dealing with both the electrical and nutritional relationships of the biological processes
- Dr. Haltiwanger worked with renown Dr. Hans Nieper of Germany

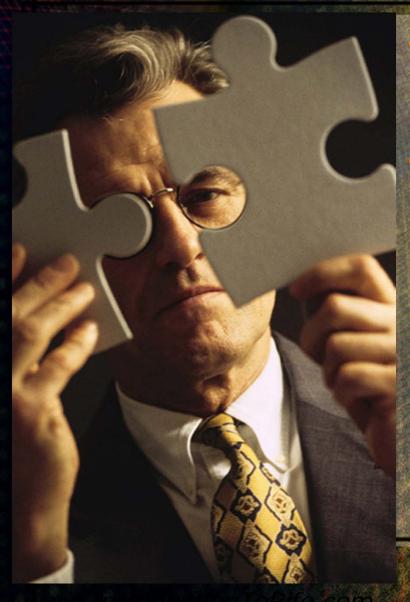

(recommended reading)

- Dr Hans Nieper (Germany)
- Especially important when examining the electrical issues involved with the biochemistry associated with disease and methods to deliver necessary nutrients via specific mineral transporters.
- Cancer, MS, Cardiovascular Disease

#### "PUZZLE PIECES"

Many of the key puzzle pieces are all around us in the very basic scientific foundations & history We may however have to examine from a slightly different perspective than classical training.

### HISTORY

#### Electromedicine

 By 9000 BC, bracelets, necklaces, magnetic loadstones, common use, being worn or applied for healthful intentions. [Schechter 1971]

• 46 A.D. the Greek physician Scribonious Largus prescribed the "seashore treatment"

 Violet Ray technology used throughout early and mid 20<sup>th</sup> century.

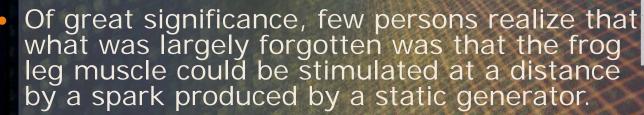

#### Rife/Tesla/Galvani (video)

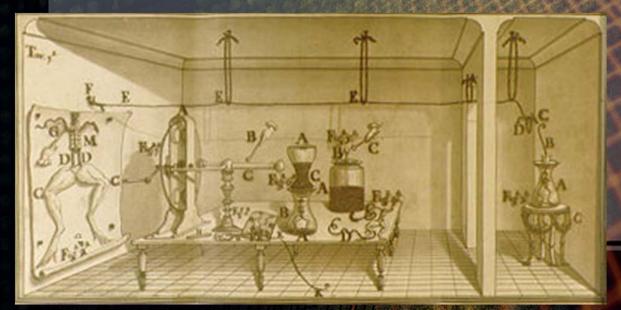

#### Luigi Galvani

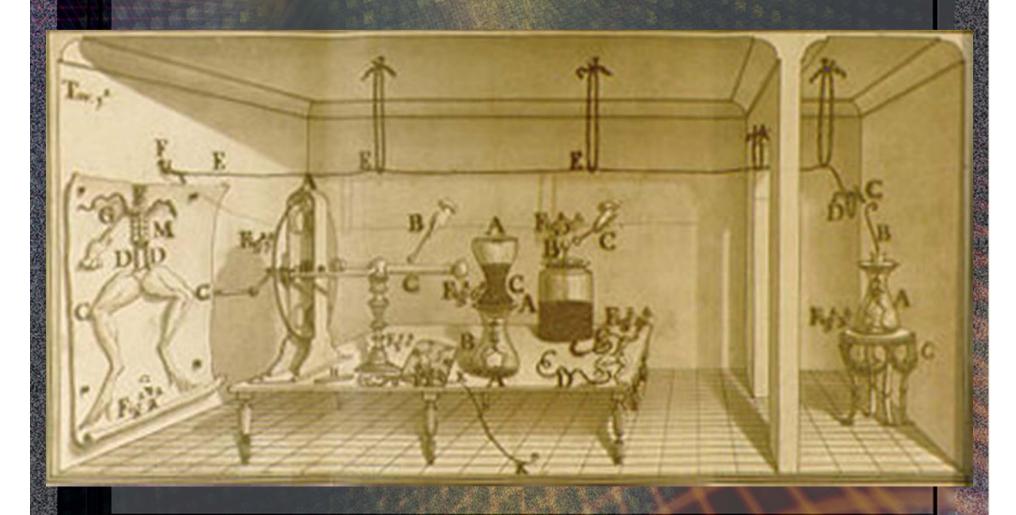

Most of us are well familiar with the Italian anatomist, physician and surgeon Luigi Galvani's electrical stimulation and activation of frog legs with an electrical current during the latter half of the 18th century.

#### Luigi Galvani's Lab

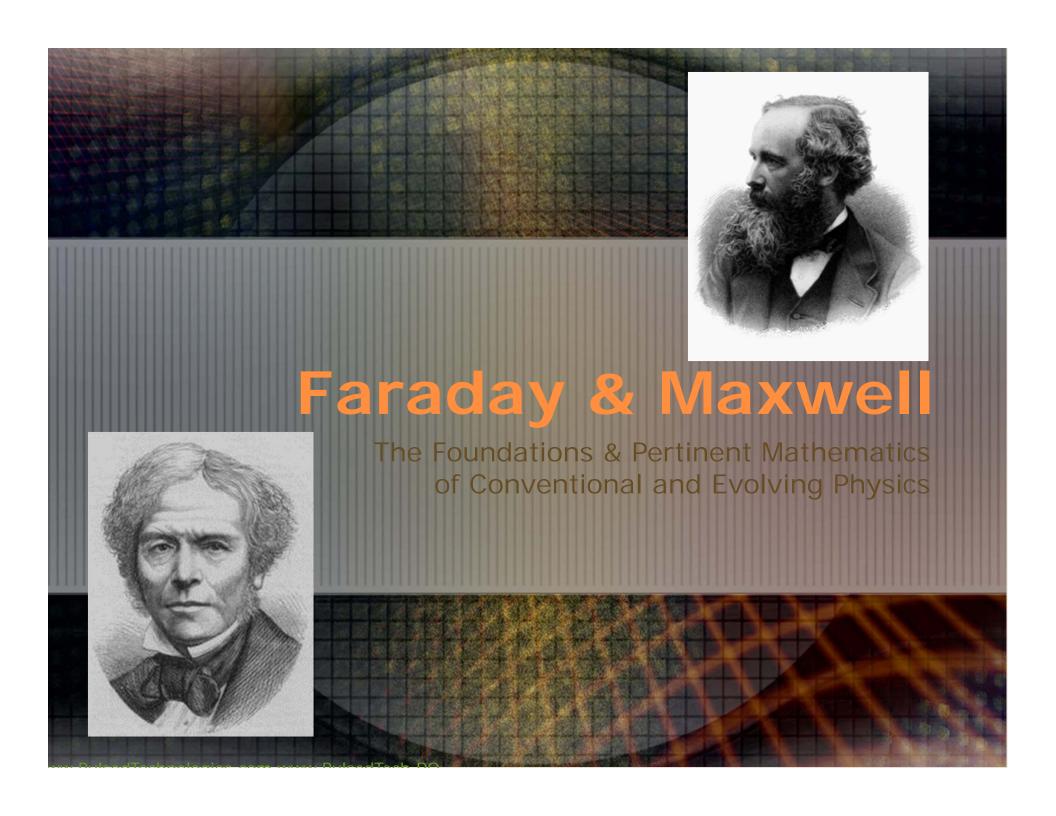

www.PulsedTechnologies.com www.PulsedTech.RO

#### Luigi Galvani Electrophysiology

- While misunderstood then, this simple concept is a very important foundation for some of the concepts of our area of study.
- He realized that at least some of the electricity he was observing was being generated within the tissues themselves.
- Galvani's historical experiments established the basis for the biological study of neurophysiology and neurology and he is credited for largely creating the science of

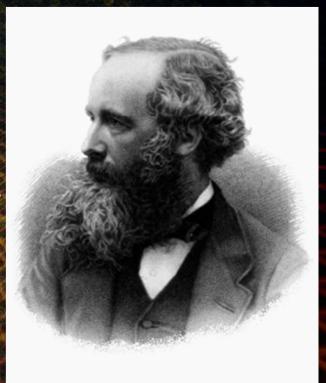

the study of the connection between living organisms and electricity.

#### Maxwell

#### JAMES CLERK MAXWELL (1831-1879)

- His most significant achievement was formulating a set of equations that for the first time expressed the basic laws of ELECTRICITY and MAGNETISM in a unified fashion
- He also developed the Maxwell distribution, a statistical means to describe aspects of the kinetic theory of gases

 These two discoveries helped usher in the era of modern physics, laying the foundation for future work in such fields as SPECIAL RELATIVITY and QUANTUM MECHANICS.

#### Faraday

MICHAEL FARADAY (1791-1867)

- Faraday established the basis for the magnetic field concept in physics.
- He discovered electromagnetic induction, diamagnetism and electrolysis.
- He established that magnetism could affect rays of light and that there was an underlying relationship between the two phenomena.
- Some historians of science refer to him as the best experimentalist in the history of science.
- It was largely due to his efforts that electricity became viable for use in technology.

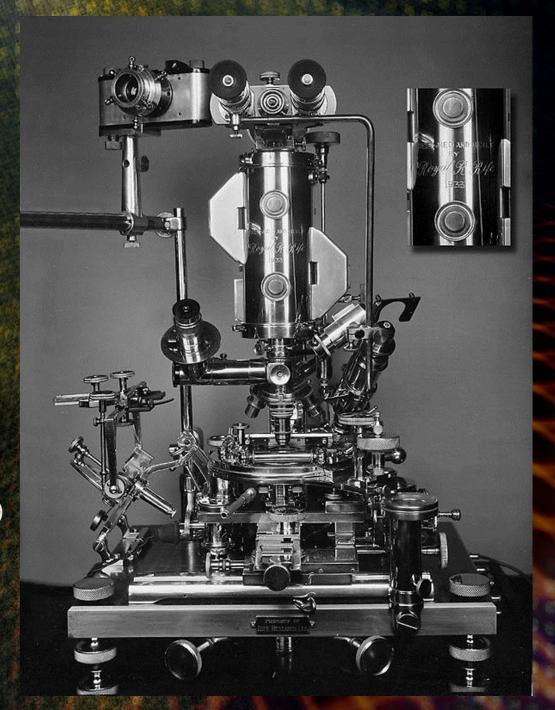

#### Rife's Universal Microscope

Cicra 1933

www.PulsedTech.RO

- Rife's Universal Microscope allowed the real time viewing of LIVE specimens at resolutions never before achieved
- Note: The (then new) electron microscope immediately killed any live specimens

www.PulsedTechnologies.com

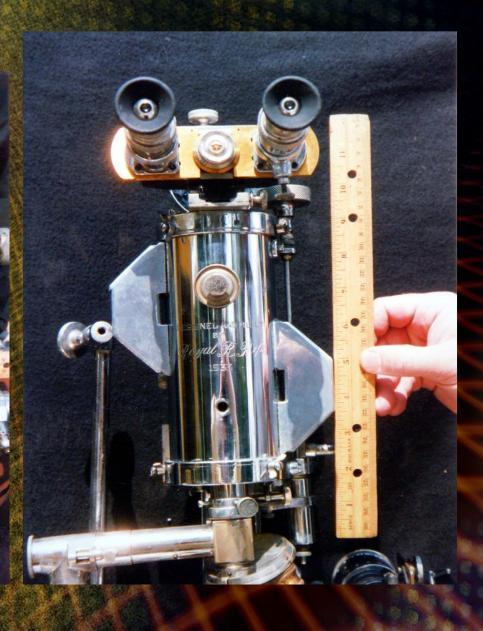

Beyond

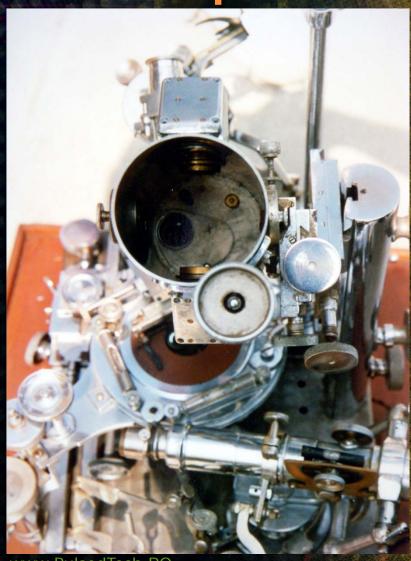

#### Rife's #3 Universal Microscope

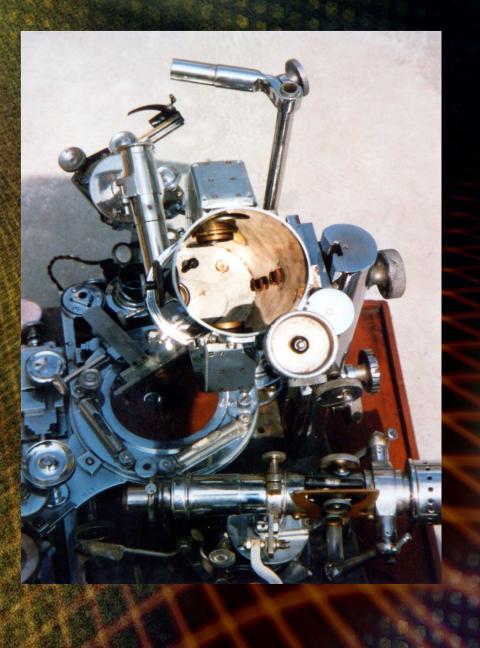

<u>www.PulsedTechnologies.com</u> www.PulsedTech.RO

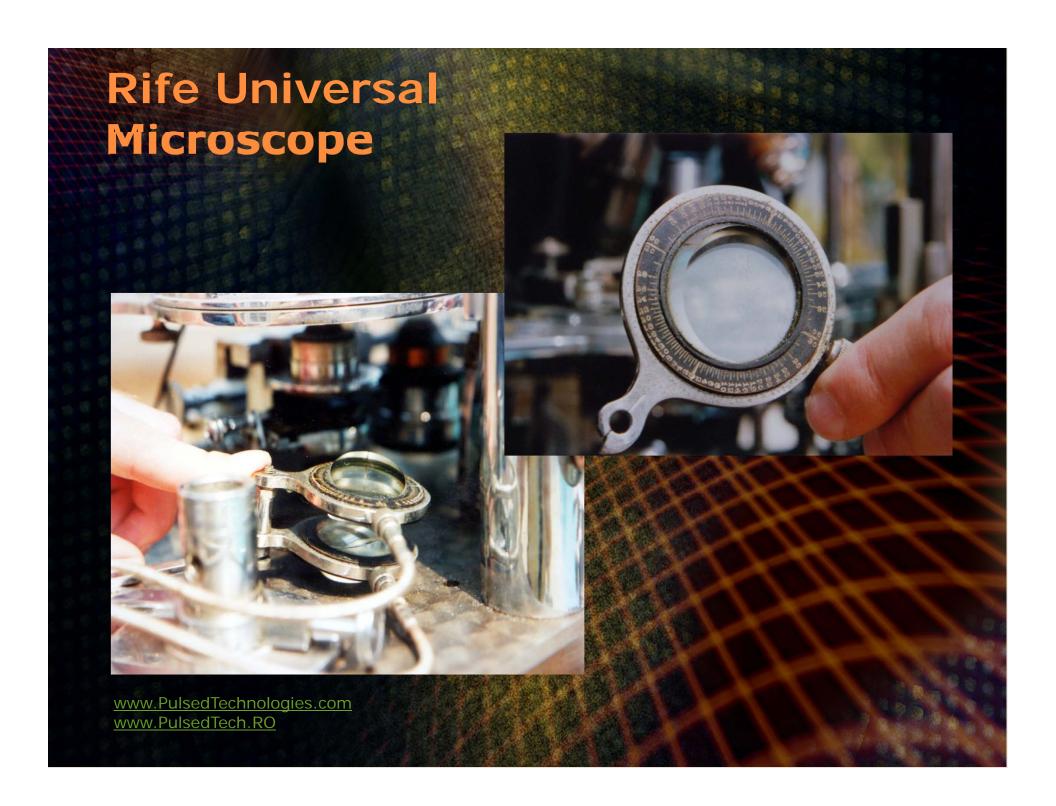

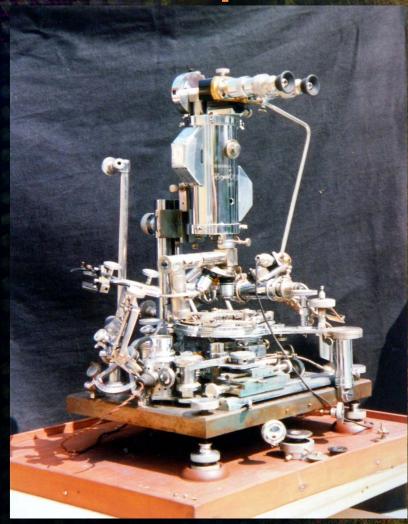

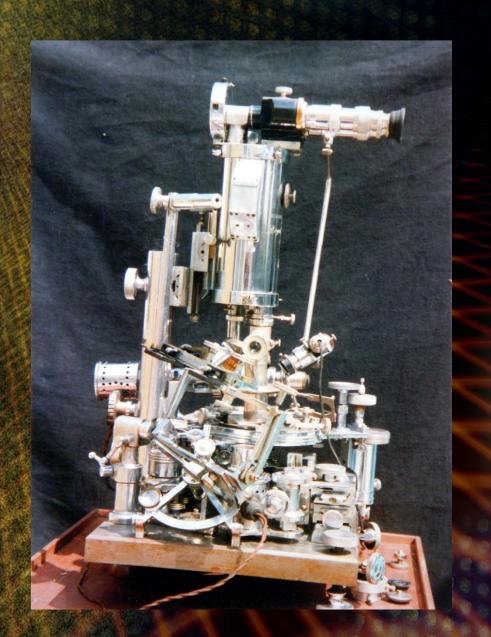

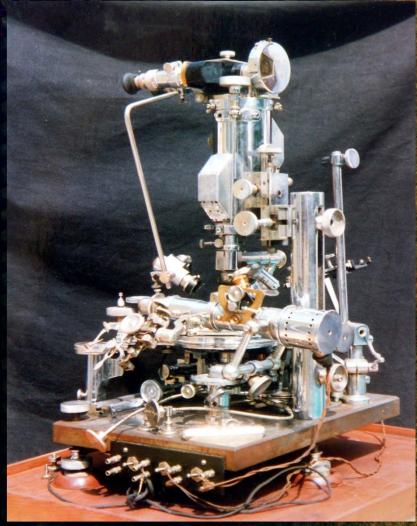

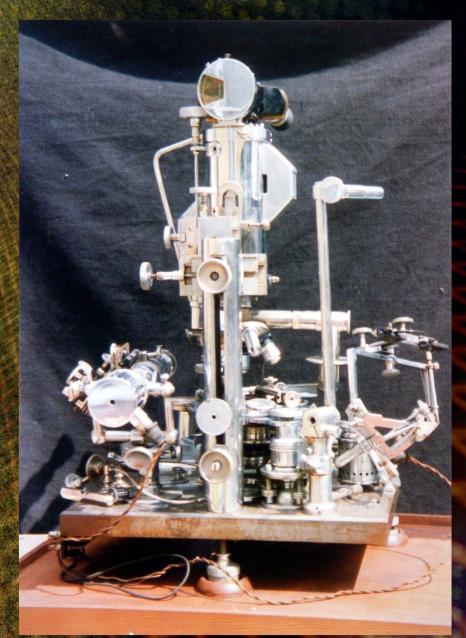

Beyond

### "End to All Disease" Banquet

### **Tumor Preparation**

Rife meticulously prepared and recorded samples for study

## Frequency Adjustments

 Rife would adjust his frequency generator to the known MOR

> Mortal Oscillatory Rate

## Observation of Destruction

 Rife would meticulously monitor the controlled destruction of the targeted pathogens

 The observer would witness the light-stained pathogen transform from a glowing violet to a dead black when the task was accomplished.

### Gerry Vassilatos

 "Dr. Rife had developed and implemented what no contemporary medical research group has ever conceived,"... "and was prevented from doing so ever again on American ground."

Gerry Vassilatos, Lost Science, 1999

#### Tom Bearden

"In the 1930's and 1940's, Royal Raymond Rife revolutionized everything that has been done before or since in high resolution optical microscopy.

He also revolutionized everything before or since in cellular biology. He carried cellular structure far beyond anything ever dreamed of at the time or presently. He revealed the direct connection between organized living energy forms and organized biological systems. He revealed that life itself is organized and dynamic, to a far finer level than anything in the textbooks today. He revealed that our present theory of disease is fundamentally very work wrong.

He produced direct, economical, electromagnetic cures of cancer, leukemia, and other such debilitating diseases. His work presages a future mankind could have had, where most debilitating diseases were quickly and economically corrected, and where no poisonous drugs, violent nuclear irradiation, and harsh chemotherapeutic "burning" of the patient would be necessary.

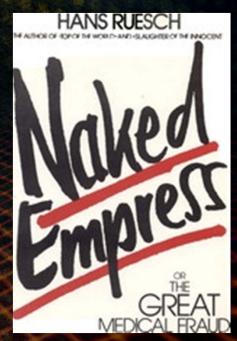

Bearden, T.E., AIDS - Biological Warfare, 1988

fundamentally very, very wrong

#### Hans Ruesch

"In the course of a vaccination trial that took place in France on October 1st, 1981, Professor Mercie, former director of the glamorous Pasteur Institute, was asked why the Institute kept producing and selling its anti-'flu vaccine despite its recognized worthlessness. Professor Mercie's candid reply: 'Because it helps financing the Institute's research'."

# The Science of Bioenergetic & Bioelectric Technologies

and other Resonant Frequency Concepts

PART 2 - UNDERLYING SCIENCE

Paul V. Dorneanu & Jimmie L. Holman

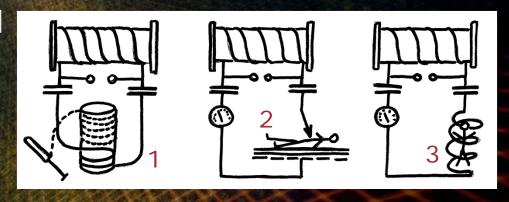

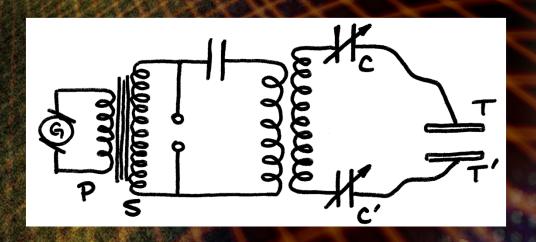

### **Frequency Based Electromedicine**

In the late 1890 and early 1900s, Tesla lectured both domestically and abroad about the virtues of frequency based electromedicine

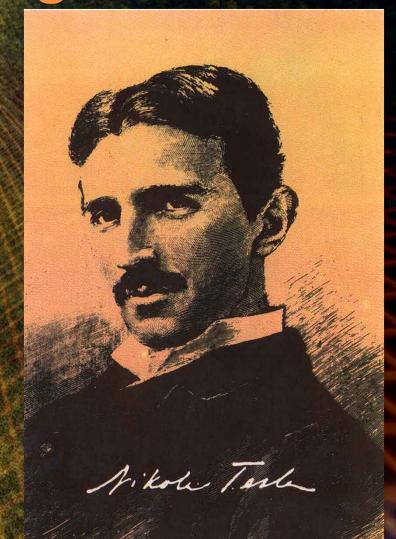

- These diagrams are from Tesla's private notes identifying methods of

   (1) Sterilization,
   (2) Electro-Surgery,
   (3) Whole Body Heating

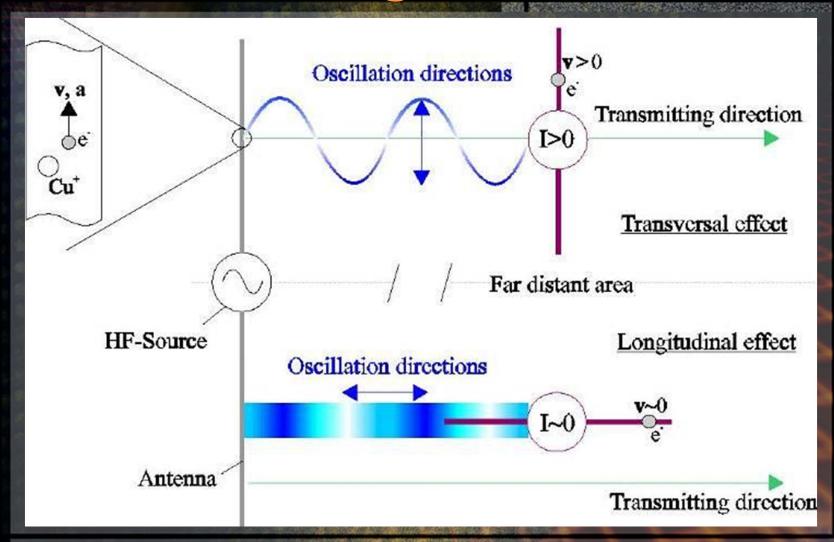

### "Hertzian Thinking"

 Tesla declared in 1919 that Hertzian thinking "has stifled creative effort in the wireless art and has retarded it for 25 years

### Transverse/Longitudinal Waves

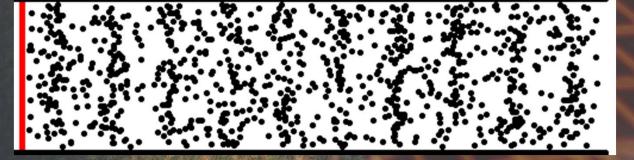

### Wave Propagation

Transverse Wave (conventional)

Longitudional Wave

# "Jump Rope" Analogy

- Coupling
- Frequency
- Amplitude
- Time
- Loss of each in conventional EM
- Remote Observer (monitor/meter) may not observe anything

### **Linus Pauling**

"A person should stay as far away from medical doctors as possible and try to avoid hospitals since they are dangerous places to be."

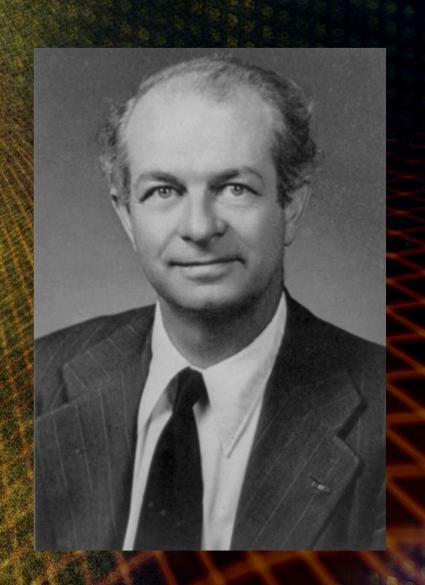

Linus Pauling - 1948

### **Linus Pauling**

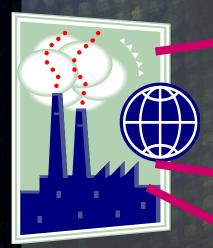

"A person should stay as far away from medical doctors as possible and try to avoid hospitals since they are dangerous places to be."

Linus Pauling - 1948

### Wireless Transmission of Power

Power Generation & Transmission

Wireless Delivery

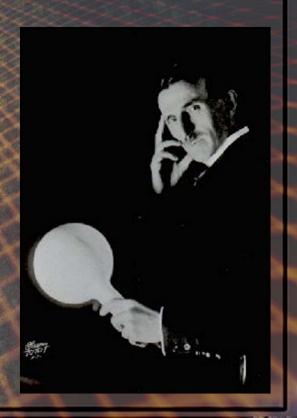

Much of Tesla's work concerned the wireless distribution and transfer of energy based on resonant frequency concepts

**Destination Users** 

### **Energy Transfer and Manipulation**

Wireless Delivery

We are technically using many of the same principles and concepts on a microscopic scale

\*Targets are selected by resonant frequency or MOR

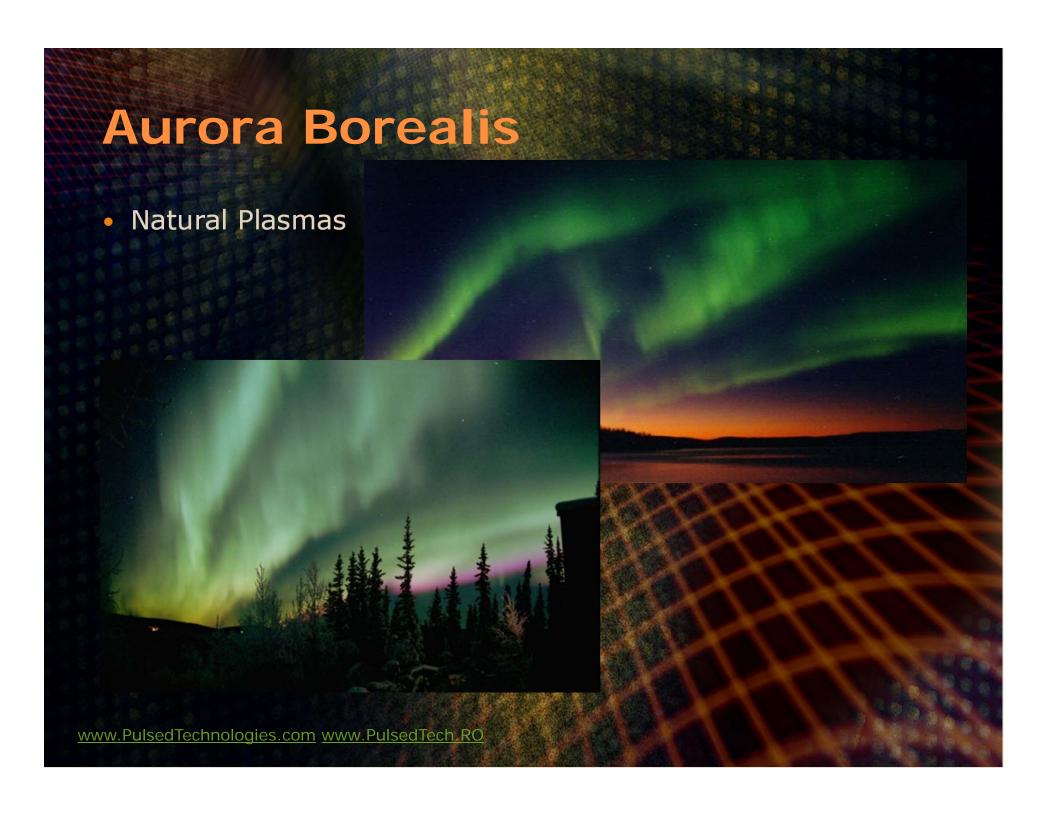

## Light Switch "Transmission"

We have probably all noticed that many times when we snap on a light switch that a "POP" may be heard on a near by radio. There is no question that SOME sort of "transmission" not only occurred ....but was also RECEIVED at the radio and processed by conventional means.

The abrupt turning "ON" of power, obviously caused a burst of energy to transfer via means that it could be received and amplified by conventional electromagnet means.

- Why do we use Plasma?
- Why do we use "light"?
- Why can we use other energy to accomplish the same things?

### Plasma (Simple Explaination)

- Plasma is the 4<sup>th</sup> state of matter AFTER "GAS"
- When excited by Radio Frequency or High Voltage, the Gas can move to the highly excited "PLASMA" state
- When the excitation is removed, the atoms must give up some of their energy....
- This energy is in the form of PHOTONS of LIGHT!
- Plasmas can be triggered and manipulated to move and alternate between the plasma and gas states at VERY HIGH RATES

### **Human Progress**

The light of human progress is not a dim glow that gradually becomes more luminous with time. The panorama of human evolution is illuminated by sudden bursts of dazzling brilliance in intellectual accomplishments that throw beams far ahead to give us a glimpse of the distant future, that we may more correctly guide our wavering steps today.

1944 - Prodigal Genius by J. O'Neill

- Power Engineering
- Scalar Emission
- Mathematical Validation of Tesla / Maxwell
- Practical Demonstration

Has also made some incredible observations in biological relationships

### Dr. Meyl's Formula Work

Maxwell equations:

$$\mathbf{rot} \ \mathbf{E} = -\delta \mathbf{B}/\delta \mathbf{t}$$

$$\mathbf{rot} \ \mathbf{H} = \mathbf{j} + \delta \mathbf{D}/\delta \mathbf{t}$$

$$\mathbf{B} = \mu \cdot \mathbf{H} \qquad \mathbf{j} = 0 \qquad \mathbf{D} = \varepsilon \cdot \mathbf{E}$$

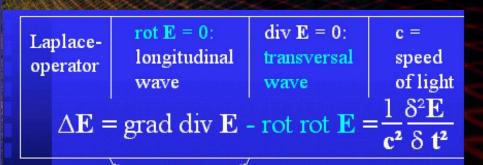

$$\mathbf{rot} \ \mathbf{rot} \ \mathbf{E} = -\mu \cdot \delta (\mathbf{rot} \ \mathbf{H}/\delta \mathbf{t}) = -\mu \cdot \varepsilon \cdot \delta^2 \mathbf{E}/\delta \mathbf{t}^2)$$

$$\mu \cdot \varepsilon = 1/c^2$$

wave equation:

$$\Delta \mathbf{E} = \text{grad div } \mathbf{E} - \text{rot rot } \mathbf{E} = \frac{1}{\mathbf{c}^2} \frac{\delta^2 \mathbf{E}}{\delta \mathbf{t}^2}$$

 Meyl's Pioneering work in examining and extending Maxwell's original equations is effectively demonstrating the underlying science and claims of much of Tesla's "misunderstood" work. Meyl's work is laying the foundation for much of the plasma work of our interest.

Div  $E \neq 0$  is a scalar  $\Rightarrow$  scalar wave!

$$\mathbf{E} = -\operatorname{grad} \boldsymbol{\varphi}$$

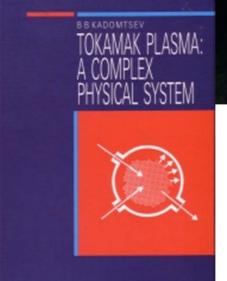

$$\begin{cases}
(1) & \operatorname{grad div} \mathbf{E} = -\operatorname{grad} \frac{1}{\mathbf{c}^2} \frac{\delta^2 \boldsymbol{\varphi}}{\delta \mathbf{t}^2} \\
(2) & \operatorname{div} \mathbf{E} = -\operatorname{div} \operatorname{grad} \boldsymbol{\varphi}
\end{cases}$$

$$\operatorname{div} \mathbf{D} = \rho \qquad (3) \qquad \operatorname{div} \mathbf{E} = \rho/\epsilon$$

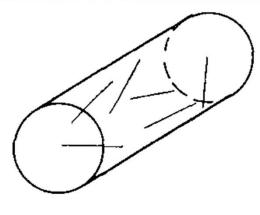

plasma wave:

$$\Delta \phi = \frac{1}{c^2} \cdot \frac{\delta^2 \phi}{\delta t^2} - \frac{\rho}{\epsilon}$$

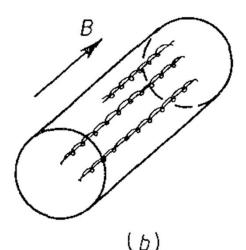

### **Charged Particles in Plasma**

 Text Source: Tokamak Plasma: A Complex System, B.B. Kadomtsev

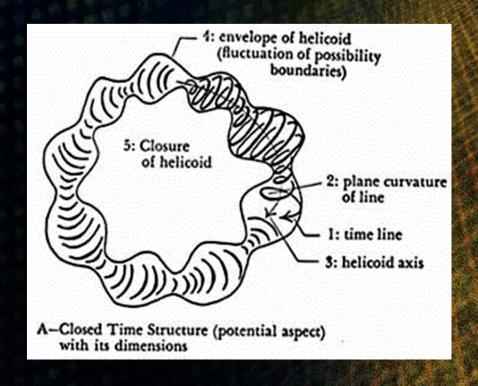

(a)

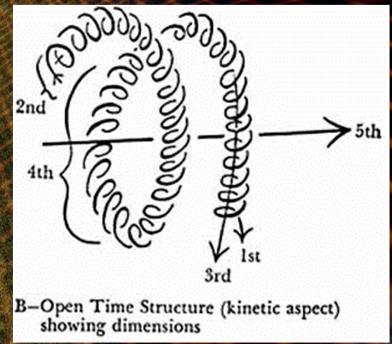

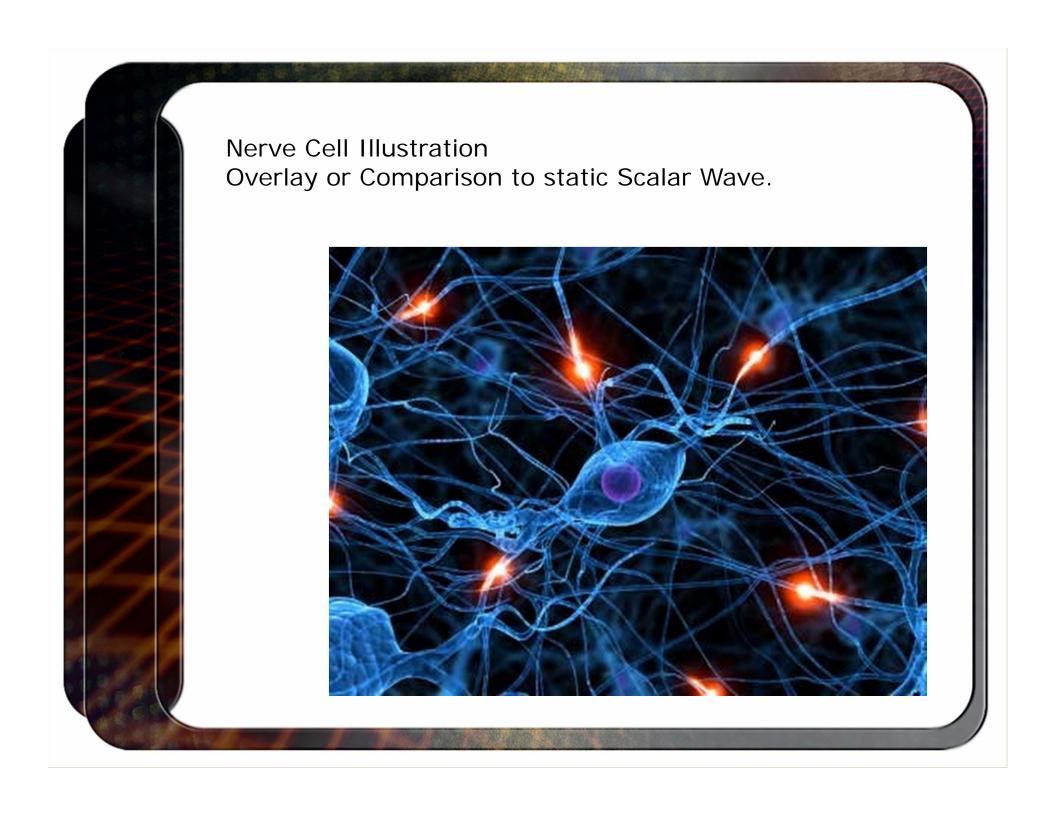

Trajectories of charged particles (a) without and (b) with a strong magnetic field.

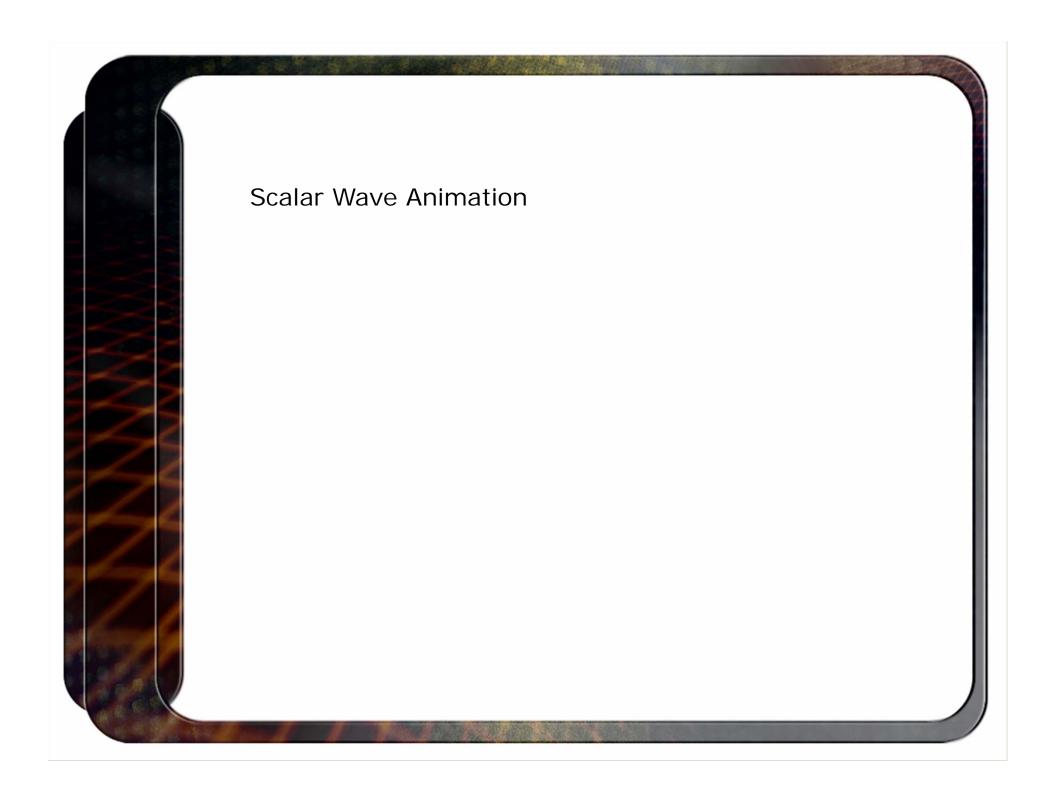

### Space-Time

 The ACTUAL emission geometries cannot easily be visualized in 3-D Space-Time BUT ... more advanced math allows us to better see internal geometrical structures and relationships

### The Biophotonic Connection

Popp, Gurvich, Kaznacheyev, Stancilescu

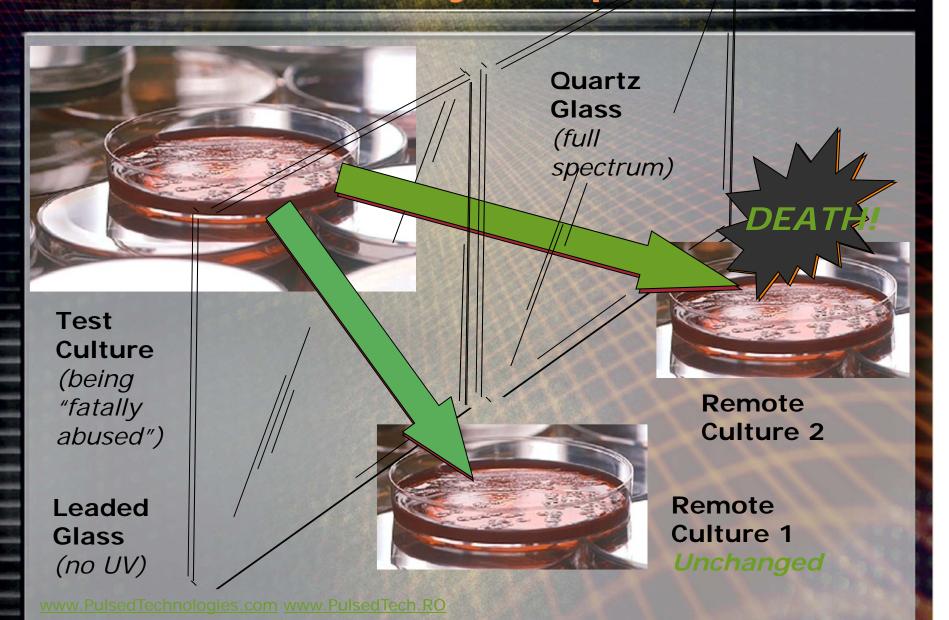

### Prof. Alexender Gurvich

• Biophotons first discovered in 1923 by Russian medical scientist Professor Alexander G.Gurvich (who named them "mitogenetic rays") and in the 1930s widely researched in Europe and the USA, biophotons have been rediscovered and backed since the 1970s by ample experimental and theoretical evidence by European scientists.

АЛЕКСАНДР ГАВРИЛОВИЧ ГУРВИЧ (1874—1954)

### Gurvich/Kaznacheyev Experiment

### Dr. Fritz-Albert Popp

- Biophotons & light energy
- German biophysicist Fritz-Albert Popp has proved their existence, their origin from the DNA and later their coherence (laser-like nature), and has developed biophoton theory to explain their possible biological role and the ways in which they may control biochemical processes, growth, differentiation etc.
- Popp's biophoton theory leads to many startling insights into the life processes and may well provide one of the major elements of a future theory of life and holistic medical practice based on such an approach.

## Quantum Entanglements • Quantum Entanglement of Photon Pairs

### **Biophotonic Emissions**

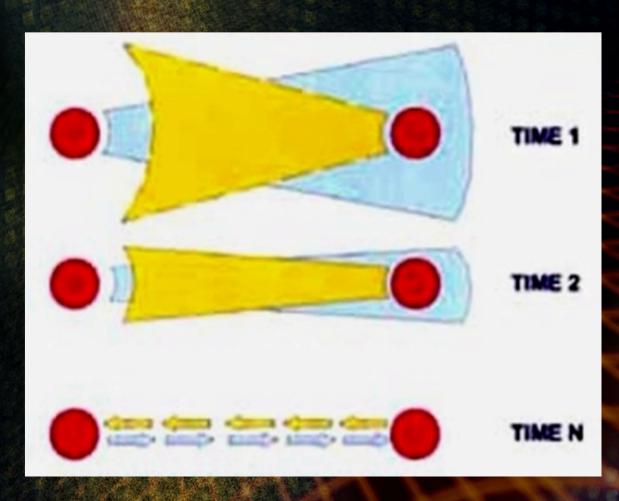

- There are so many ramifications to the study of biophotonic emissions that it is difficult to elucidate at this time.
- Biophoton studies seem to indicate that the emission is coherent and that biophotons may be modulated and communicate information not only throughout the body but into the extended environment.
- It may be the process by which DNA actually communicates its information to protein molecules in the process of morphogenesis.
- It may have relevance to extra-sensory modes of communication with other life forms and explain many mysteries of life.

#### Too "Far Out" for Most Folks

- According to the biophoton theory developed on the base of these discoveries the biophoton light is stored in the cells of the organism - more precisely, in the DNA molecules of their nuclei - and a dynamic web of light constantly released and absorbed by the DNA may connect cell organelles, cells, tissues, and organs within the body and serve as the organism's main communication network and as the principal regulating instance for all life processes.
- The processes of morphogenesis, growth, differentiation and regeneration are also explained by the structuring and regulating activity of the coherent biophoton field.
- The holographic biophoton field of the brain and the nervous system, and maybe even that of the whole organism, may also be basis of memory and other phenomena of consciousness, as postulated by neurophysiologist Karl Pribram and others. The consciousness-like coherence properties of the biophoton field are closely related to its base in the properties of the physical vacuum and indicate its possible role as an interface to the non-physical realms of mind, psyche and consciousness.

### Quantum Potential Self Targeting

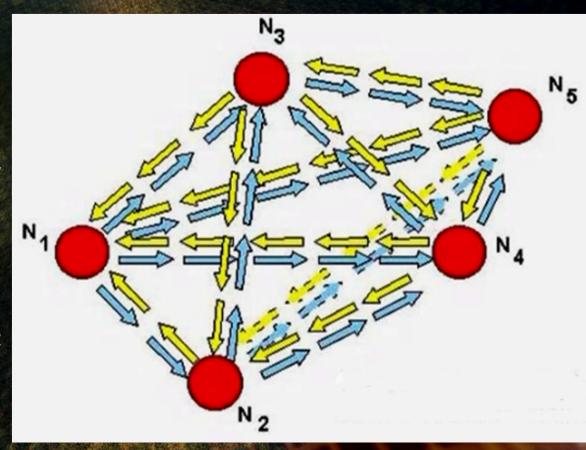

- Narrowing if interacting potentials into laser-like beams, between two pumped sources
- Now only Longitudinal Waves Connect the Linked Objects

Credit: T.E. Bearden - Radionics: Action at a Distance

### Nodes Participating in the Quantum Potential

- Quantum potential exists as narrow, laser-like beams between participating nodes, even when the nodes are widely separated
- Beam space is multiply-connected; transmission is instantaneous

Credit: T.E. Bearden - Radionics: Action at a Distance

### **Device Catagories**

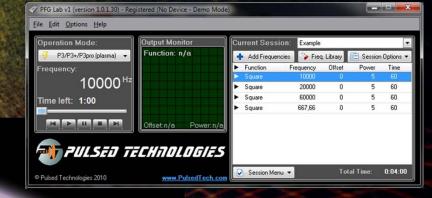

- CONTACT: The PFG series devices represent the heart of all Pulsed Technologies systems and allows for direct electrode contact with subject.
- RADIANT: The P3 (Plasma) and PPLED (new generation specialty diodes) devices series allow for .....
- PROFESSIONAL/HYBRID
- SPECIALITY: Custom Protocol Imprinting occurs only AFTER initial CS solution is manufactured.

Pulsed Technologies Private Document

### **PFG2z Personal Device**

PULSED TECHNOLOGIES

PULSER FELHARIDATES

PFGZZ

www.palsedrech.com

**10 MHz Precision Function Generator** 

### PFG2z Personal Device with ICS Accessory

### PFG2x Personal Device

### PFG2(a) Personal Device

### PFG(1b)

The PFG1b Precision Function Generator is available in limited supplies and only to professionals and serious researchers.

### ICS Accessory

- Extremely High-Grade Colloidal Silver Solution may be generated with any of the Pulsed Technologies PFG or new P3pro (2011) devices and the ICS Accessory.
- ICS solution becomes the "media" for user-defined IMPRINTABILITY of custom protocols.
- Custom Protocol Imprinting occurs only AFTER initial CS solution is manufactured.

### **CS** Testing

- Traditional (crude) methods of CS verification typically suggested on the net and by manufacturers ARE NOT VALID for the exceptional grade CS produced by this method.
- Tyndall cone (light beam) produced with a laser reflecting off large silver particles is NOT present when atomic cluster size is SMALLER than the wavelength of light
- Tyndall Cone actually is an indicator of POOR quality CS (large ineffective particle cluster size)!!!
- TDS (Total Dissolved Solids) Meters typically sold for testing tap or drinking water often are not useful or accurate for this grade of solution and must be examined with laboratory grade equipment and resources.

### **Early Imprinting Experiments**

 Earlier imprinting via pulsed plasma, while apparently successful was quite limited to the few who could afford the experimental equipment and never intended for end-user manufacturer.

#### ISSUES/CONCERNS

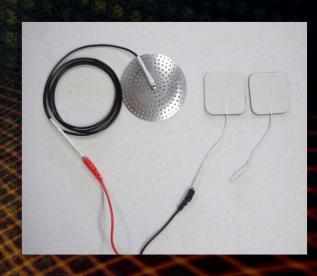

- Complex Setup
- Expensive equipment setup
- Extensive knowledge requirements
- Limited frequency range
- Limited ability to validate

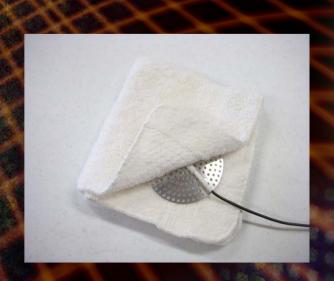

### Immerse-able Electrode

- May be used as an electrode in a footbath for excellent large area conductivity
- Or in a moist/wet cloth for localized application to wound area
- Replaces one of the conventional electrodes

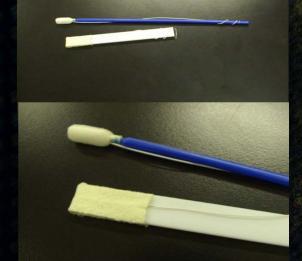

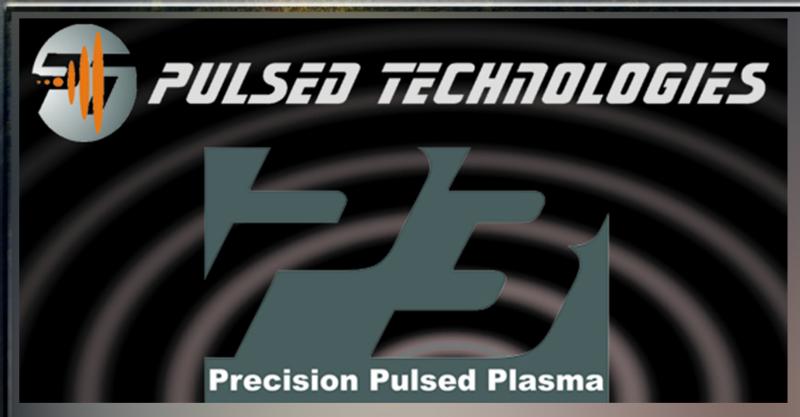

- Method of localized electrode placement when target area is very small, such as a tooth or mouth sore.
- Other electrode is conventional and may be placed anywhere on the body such as neck or shoulder.

#### P3 - Precision Pulsed Plasma

The Pulsed Technologies P3 and P3pro - Precision Pulsed Plasma devices are the premier plasma systems. The P3 requires the PFG — Precision Function Generator as a system control device the P3pro has the PFG device and optional oscilloscope/spectrum analyzer incorporated into the device.

### P3+ (2009) Personal Device

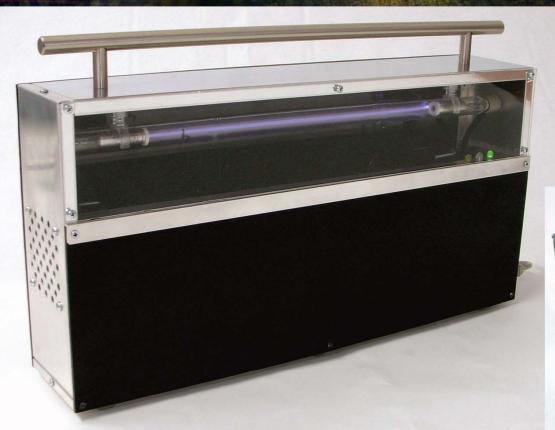

#### P3pro Device Details

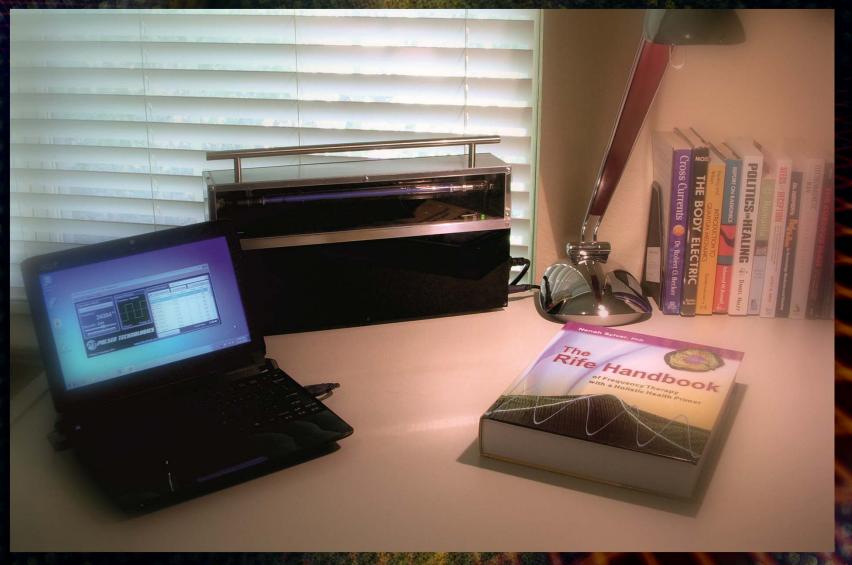

The new P3pro Precision Pulsed Plasma Research Device also has the capability for electrode and CS accessory attachment

## P3pro Station

www.PulsedTechnologies.com www.PulsedTech.RO

## P3 Special Application Commercial Devices

- The P3tm (Toxic Mold) Systems were designed for commercial Mold Remediation applications.
- System allows for off-site remote control of multiple "slave" systems.

#### P3 Plasma Technology

Precision Pulsed Plasma

Pulsed Technologies P3 represents the latest developments in precision pulsed plasma for resonant frequency research.

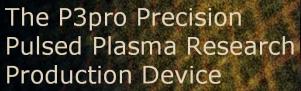

www.PulsedTechnologies.com www.PulsedTech.RO

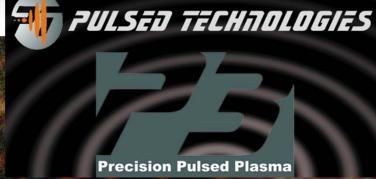

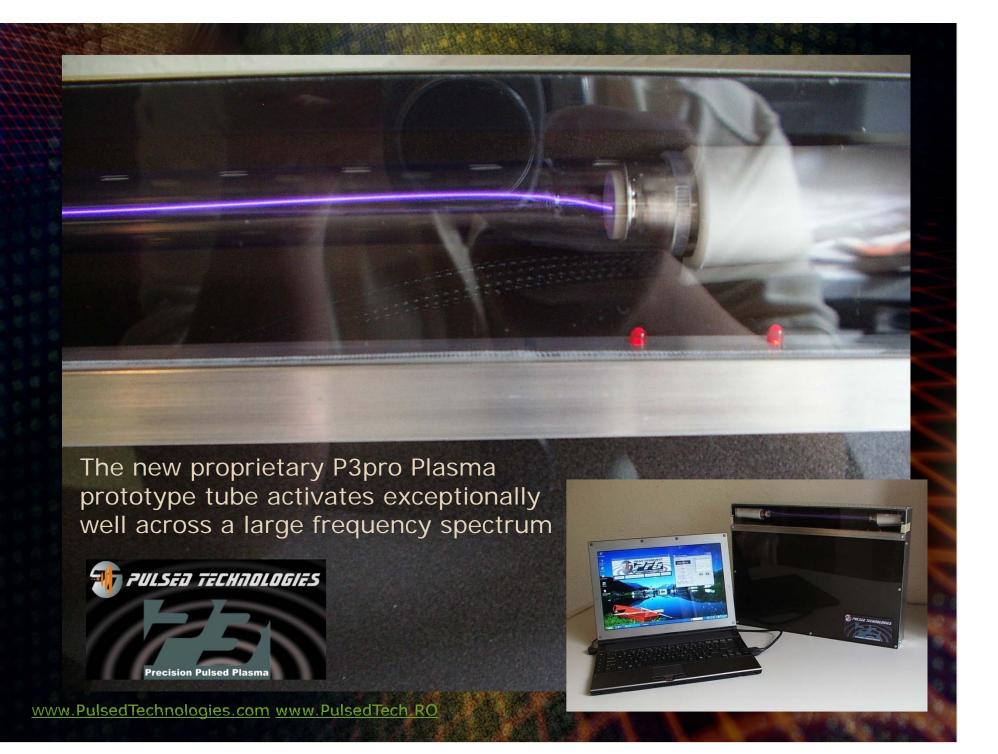

www.PulsedTechnologies.com www.PulsedTech.RO

#### **PPLED**

 Precision Pulsed (high output) new generation of LEDs provide excellent wide spectrum precision pulsing through homeopathic samples to theoreatically modulate and embed homeopathic information onto the photonic carrier.

#### **PPLED**

 Precision Pulsed (very high output) new generation of LEDs

 Spectral output across "therapeutic spectrum"

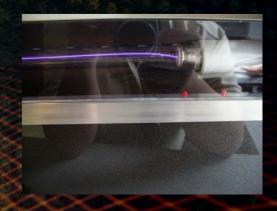

Any Pulsed Technologies PFG device with PFG Lab Software can precisely drive the PPLED device with accurate and scripted frequency pulse rates with waveform control

## Plasma Tube Development

Pulsed Technologies decade-long effort in development of an ultimate Plasma tube was finalized in late 2009 and early 1010. The tubes are optimized for the latest generation P3 series of devices.

Pulsed Technologies Private Document

#### Advanced Plasma Tube Development

Pulsed Technologies decade-long effort in development of an ultimate Plasma tube was finalized in late 2009 and early 1010. The tubes are optimized for the latest generation P3 series of devices.

#### Plasma Exposure to Test Subject

 Plasma Tube encompassing specimen to monitor and record effect in real time

> Custom tube design Jimmie Holman Fabrication by Barry Allred – Allred Neon

www.PulsedTechnologies.com www.PulsedTech.RO

### Proximity Exposure

- It was found, close proximity was not required when working with plasmas
- The inference being, that the modus operandi is NOT a strict EM phenomena
- This meant the microscopes and test instruments themselves did not require any special modifications

#### **Electronic Imprinting**

 Is it not already possible to imprint specific electronic signatures into substances such as water to assist the body in natural repair and regeneration?

#### The Human Energy Field

 The human body continually has energy moving through it which creates an organizing Quantum Electro Dynamic Field that creates, surrounds and permeates the matrix of the body

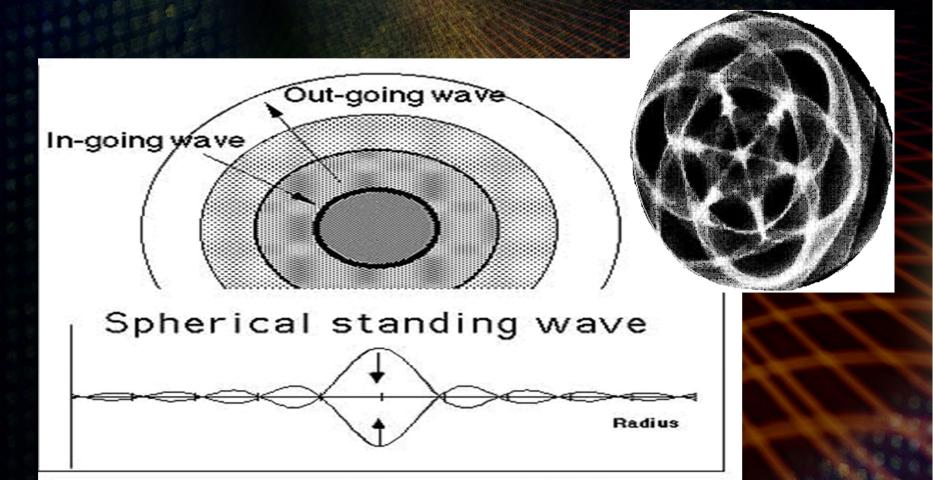

- This standing energy field may regulate the neural and chemical control systems of the body
- This field is the primary information system of the body and is involved in pattern formation

- According to quantum theory, an entity whether it is an atom or a molecule simultaneously possesses both localized (particle) and distributed (wave) properties.
- When two waves come together they interact with each other producing an interference pattern, this is a pattern capable of holding information.

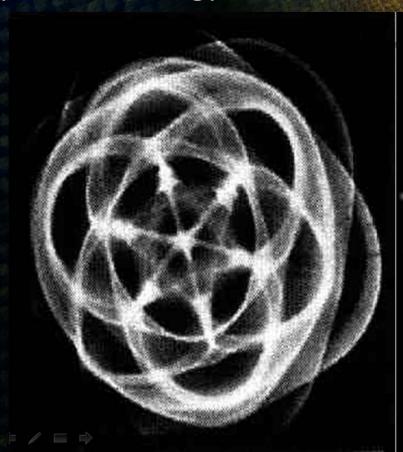

## Biological Cells & Tissues are Organized by Standing Waves

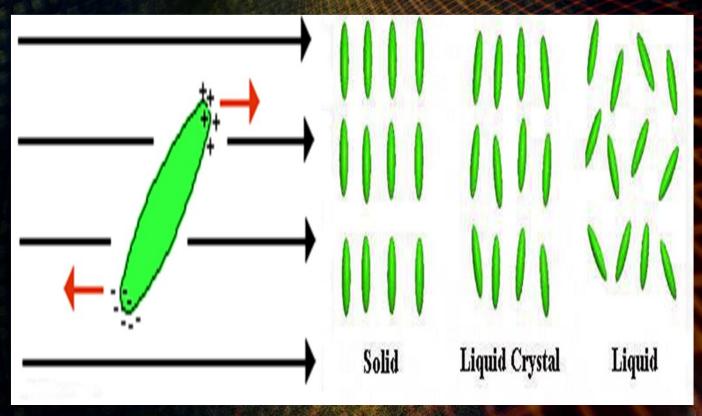

#### **Coherent Forms**

 Physical forms are representative of the energy fields present. Energy is stored in coherent forms

#### **Liquid Crystal Arrays**

 Biological molecules are -Liquid Crystals, which will array in coherent patterns when exposed to EMFs

#### The Human Template

 According to Robert Becker the body has a DC electric field (Becker, 1990).

- According to Valerie Hunt, changes occur in the human energy field prior to changes occurring in physical systems (Hunt, 1989).
- One could theorize that disease and healing manifests first in the energy matrix and then the physical matrix

 Therefore reorganization of damaged energy matrix could facilitate healing.

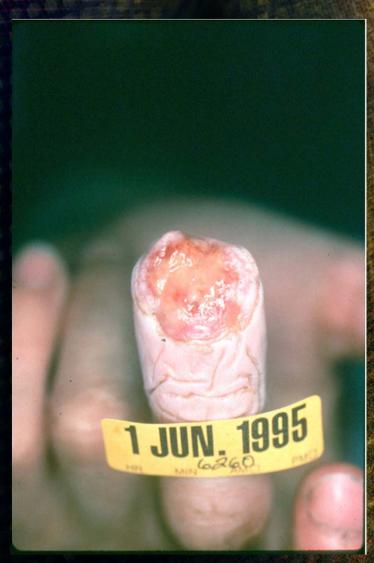

#### Regeneration into the Matrix

#### Chemical vs. Electrical System

- Conventional medicine approaches the body as a BioCHEMICAL system rather than a system controlled by a
- Voltage/current pH
- Measurement of pH is really an indicator of voltage/current

[insert photo/drawing]

### Healing = Voltage = pH

Text1

Text2

[insert photo/drawing]

#### **Fundamental Philosophy**

- We don't get well by making defective cells work
- We get well by making NEW cells work correctly
- Pharmaceuticals are not needed to make new cells
- Pharmaceuticals may buy time for the body to repair
- The key to solving chronic disease is to make the cells work and/or work better
- The cells MUST have the needed materials (nutrients, fats, proteins) available for use.
- The cells MUST have the needed energy (electrical charge) to power the metabolic functions.

#### pH (Potential Hydrogen) Basics

- Water (H<sub>2</sub>O) ionizes into: Hydrogen (H+) ions and Hydroxyl (OH-) ions
- ACIDIC (<7pH) there exist more H+ ions than OH- ions</li>
   H+ is an ELECTRON STEALER
- ALKALINE (>7pH) there exist more OH- ions than H+
- OH- is an ELECTRON DONOR
- A pH of 7.0 is NEUTRAL (neither acid or base/alkaline and represents a voltage potential of 0)
- Chronic disease is almost always associated with ACIDIC pH
- Health is associated with a slightly ALKALINE pH

#### pH Scale Examples

pH= 0	
pH = 1	
pH = 2	
pH = 3	
pH = 4	
pH = 5	
pH = 6	
pH = 7	
pH = 8	
pH = 9	
pH = 10	
pH = 11	
pH = 12	
pH =13	
pH = 14	

0 - Battery Acid

1 - Hydrofluoric Acid (Stomach Lining)

2 - Lemon Juice. Gastric Acid, Vinegar

3 - Grapefruit, Orange Juice, Sodas

4 - Tomato Juice, Acid Rain

5 - Softened Drinking Water, Black Coffee

12 - Soapy Water

13 - Bleaches, Oven Cleaner

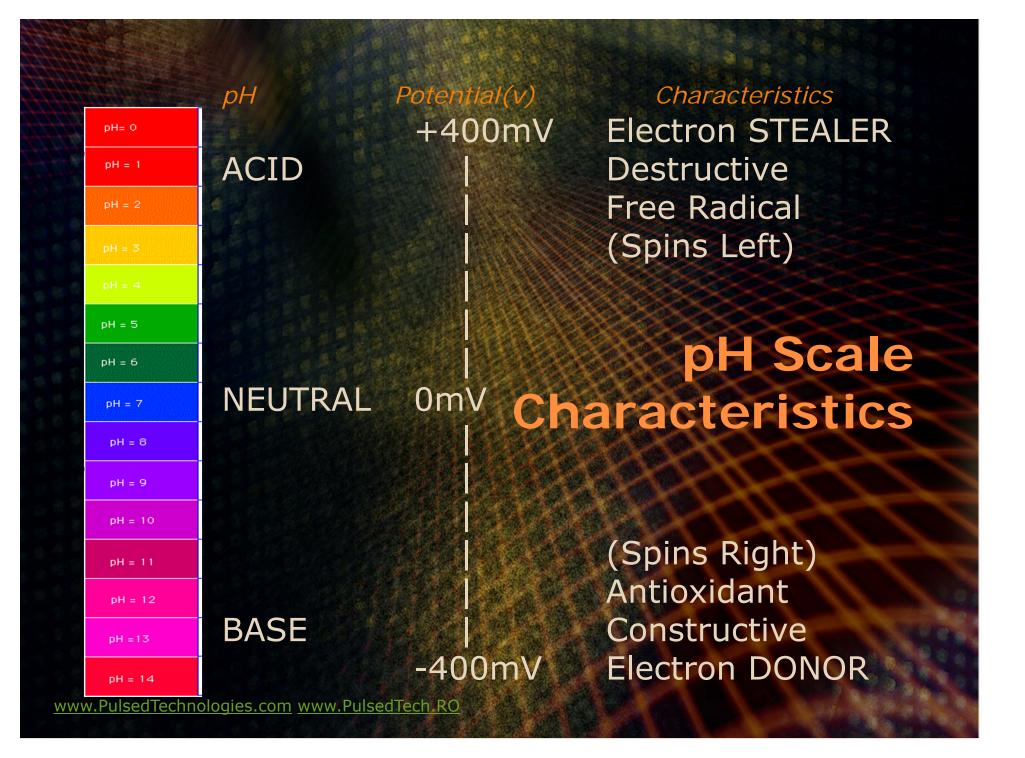

14 - Liquid Drain Cleaner

#### 10,000,000 pH= 0 1,000,000 pH = 1100,000 10,000 1,000 100 pH = 510 pH = 6(neutral) pH = 71/10 pH = 81/100 pH = 91/1,000 pH = 101/10,000 pH = 111/100,000 pH = 121/1,000,000 1/10,000,000 pH = 14

# pH Scale – Concentration of Hydrogen Ions Compared to Distilled Water

- pH = potential Hydrogen Ions
- pH is largely an ELECTRICITY related measurement

www.PulsedTechnologies.com www.PulsedTech.RO

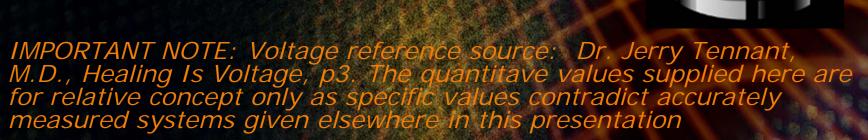

#### Voltage – pH - Pain

- Alteration of pH toward the Acidic is interpreted by the brain as PAIN
- Correcting the pH CURES the PAIN
- Conventional Drugs simply BLOCK the pain "signal" (the cause still exists)\*
- Chronic pain is always associated with a loss of voltage (acidic pH) [Tennant]

\* NOTE: Typical opiates indeed block the perception of pain, typically side effects include confusion, sedation, nausea, constipation, addiction, and suspected suppression of immune system and other biological processes.

#### Voltage - Healing - Disease

- Cells in the body typically run at about -22 (to 30) mV
- During repair, voltage is increased to -50 mV until repair is accomplished.
- "Problems occur when the cell runs out of Voltage before healing is accomplished"
- Metabolic cellular functions simply don't function well when the cell is in a low voltage state.
- At +30mV, Damage to DNA and production of tumors occur

www.PulsedTechnologies.com www.PulsedTech.RO

#### Longevity, Aging & Healing

- In both aging (Barker, 1983) and degenerative conditions cells lose their membrane charge. Photo and frequency therapy has the ability recharges cell membranes.
- The cells can then use this energy in many ways; but most especially in production of ATP, the "energy currency" of the living tissue.
- In restoring the charge of the cells that are functioning sub-optimally, the body can be moved naturally towards a state of health, which is manifested by faster tissue regeneration (Vodovnik, 1992).

#### 3 Underlying Themes

 Endogenous electrical activity of the body can be used as indicator of a particular pathological process without attributing a cause/effect relationship. [Edelberg 1971,1977 Marino et al. 1989, Woodrough et al 1975]

- Endogeneous electrical activity of the body acts as an initiator, control mechanism or modulator of the post embryonic growth & healing processes. [Becker et al. 1962, Becker 1967, 1974, Borgens, Foulds and Barker 1983, Kinkle et al. 1981, Illingworth and Barker 1980, Patel and Poo 1982]
- By enhancing the endogeneous electrical activity of damaged tissues, the growth and/or healing processes can be stimulated or enhanced [Brighton et al 1981, Brown et al. 1988, Carley and Wainapel 1985, Kincaid 1989, Kloth and Feedar 1988, Reed, Rowley et al. 1974, Wheeler et al. 1969]

#### The Bioelectric Cell

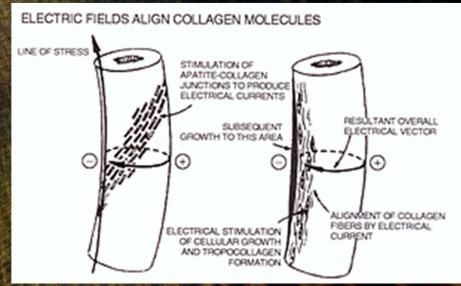

- Every Living cell has a membrane potential, (appx -70mV) with the inside of the cell being NEGATIVE relative to its external POSITIVE surface.
- Cell membrane potential is strongly linked to cell membrane TRANSPORT MECHANISMS
- Most of the material that crosses the cell membrane is ionic (CHARGED movement of CHARGED PARTICLES)

- Movement of CHARGED PARTICLES influences MEMBRANE POTENTIAL
- Change of MEMBRANE POTENTIAL influences ion/CHARGED PARTICLE MOVEMENT

#### **Endogenous Bioelectricity**

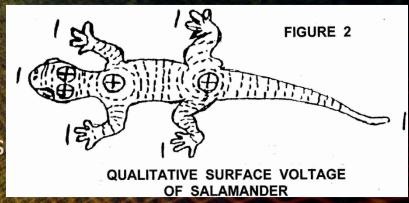

- TISSUE BATTERIES
  and other tissues found in bone, skin, muscle, nerve and produce a potential difference (VOLTAGE) between parts of the tissue.
- This voltage is DIFFERENT in injured and non-injured situations

- BONE exhibits piezoelectric potentials, streaming potentials, and steady potentials [Fukada 1984, Pollack et al. 1984, Friedenberg et al. 1973, Borgens 1984, Chakkalakal et al. 1998]
- SKIN responses to physical and psychological stimulation and injury [Barker et al. 1982, Edelberg 1968, Foulds and Barker 1983, Christi and Venables 1971, Millington and Wilkinson 1983, Vanable 1989]
- MUSCLE [Betz et al. 1984, 1986]
- COLLAGENOUS BASED TISSUES [Anderson and Eriksson 1968, Athenstaedt 1970]

#### **Endogenous Bioelectricity**

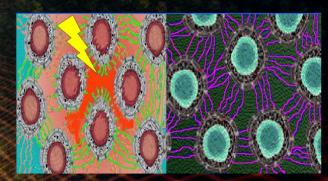

GROWING &
 DEVELOPING TISSUES
 exhibit numerous and
 interesting bioelectric activities

- Amphibian Limb Regeneration [Borgens 1982, Becker 1961, Sisken 1983]
- Mammilian Partial Limb Regeneration [Neufeld 1989, Becker 1972]
- Rabit Ear Regeneration [Chang and Snellen 1982, Goss 1981]
- Fingertip Amputation and Regeneration in children [Illingworth and Barker 1980]
- Embryology and Morphogenesis [Robinson 1989, Jaffe 1981, 1986, Jaffe and Nuccitelli 1977, Nuccitelli and Erickson 1983]

### **Endogenous Bioelectricity**

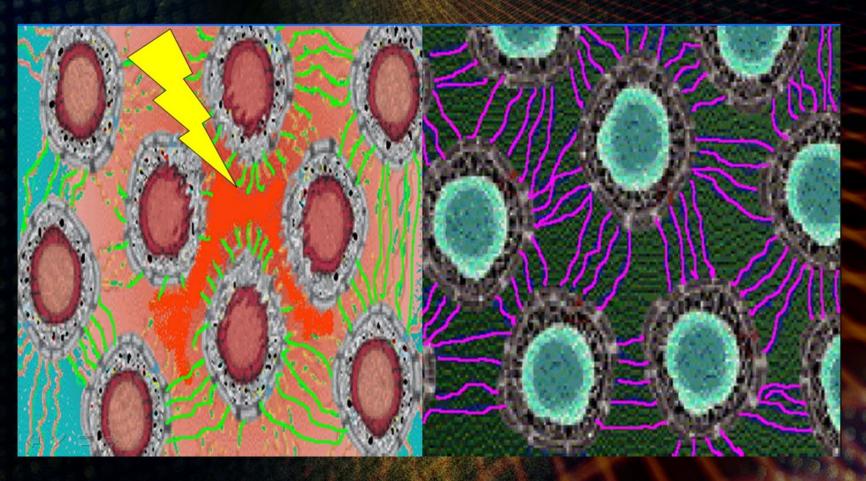

- INJURED TISSUES reported to be electrically active, and this appears to be more than an epiphenomenon.
- Origin of the injury potential remains debatable [Nordenstrom 1983, Thakor and Webster 1978, Becker 1967, 1974]

- Tissues which have demonstrateable electrical changes on injury include:
  - SKIN [Barker et al. 1982, Foulds and Barker 1983, Jaffe and Vanable 1984, Vanable 1989]
  - BONE [Friedenberg et. Al. 1973, Lokietek et. Al. 1974, Chakkalalal et. Al 1988, Borgens 1984]
  - MUSCLE [Lokietek et. al. 1974, Betz et al. 1984]
  - **NERVE** [Shibib et al. 1988a,b, Borgens and McCaig 1989]
  - BLOOD VESSELS [Sawyer et al. 1953]
  - ULCERS & OTHER SKIN WOUNDS appear to have electrical links [Carley and Wainapel 1985, Rowley 1985, Griffin et al. 1991, Kolth and Feedar 1988, Reed 1988]

### Disease / Breakdown

 Disease may be a result of the breakdown in integrity of the connections within and between the cells

#### **Electrical Restoration**

- Use of frequencies that match biological resonance promote healing
- By restoring current flow, recharging cell membranes, improving cell-to-cell communication,
- And by increasing nutrient uptake by cells, toxin release, protein synthesis, energy production, etc.

## Destruction or Healing

 With Rife technology, pathogens can be oscillated to destruction by applying specific frequencies that increase their resonant frequency amplitude.

 Healing of cells and tissues can also be enhanced by the correct resonance, since every substance has its own unique vibration or signature.

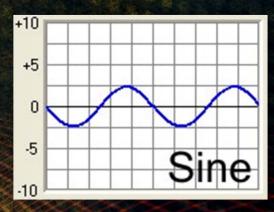

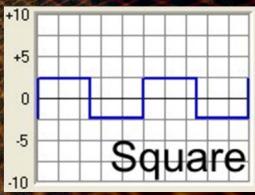

HOW?

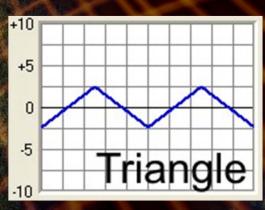

## **Basic Waveforms**

- SINE Wave
- SQUARE Wave
- TRIANGLE Wave
   (also called "sawtooth")

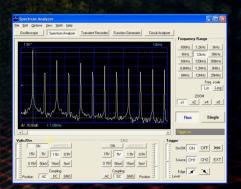

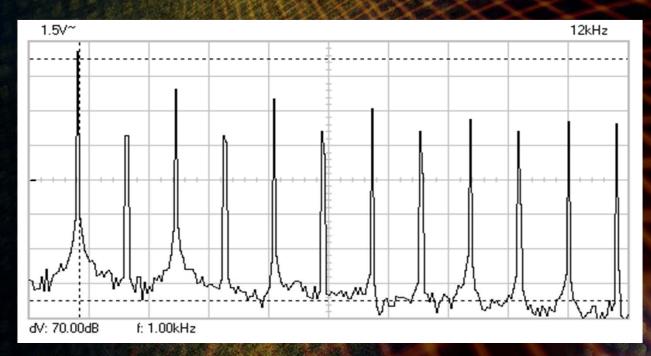

#### Harmonics

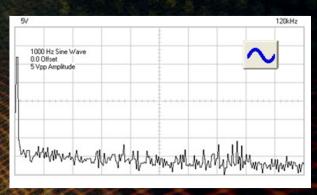

- Harmonics are MULTIPLES of the generated wave
- Depending on the type of wave, the energy may also be exhibited in and shared in the harmonics

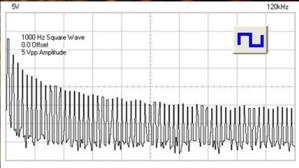

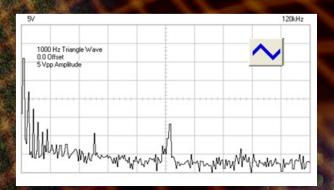

## Harmonic Spectral Analysis

Sine Wave has virtually NO harmonics; all power is utilized at "fundamental" frequency

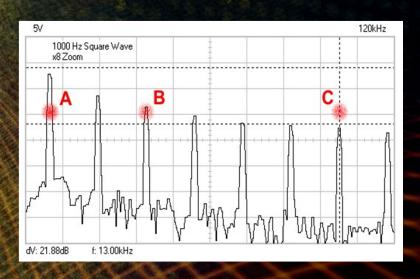

- Square Wave has an ABUNDANCE of harmonics which diminish in amplitude (power) with each successive harmonic. Power is spread across spectrum
- Triangle Wave also contains harmonics but are limited to relatively close to the fundamental frequency. These harmonics also reduce in amplitude (quickly). Most power is concentrated near fundamental frequency

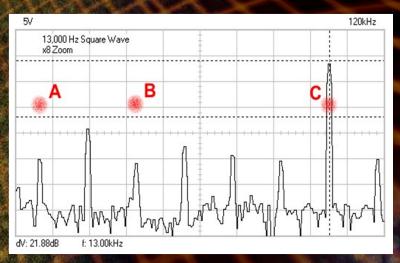

## **Harmonic Targeting - HF**

- Pathogen Destruction requires BOTH accurate frequency AND substantial amplitude to bring about energy transfer/destruction.
- If the MOR of a pathogen is much higher than the fundamental frequency, the harmonic may not have enough amplitude to bring about change, coupling or destruction
- Pulsed Tech equipmet typically has the ability to generate the higher frequencies at full power to bring about the desired effects.

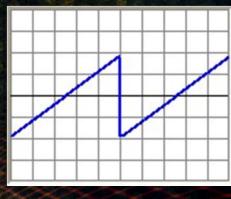

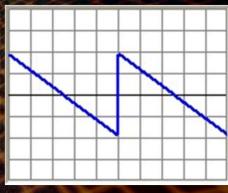

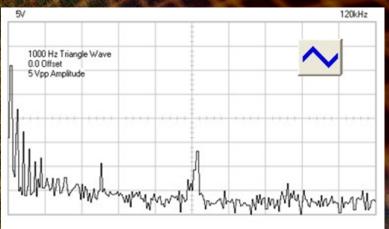

## **Modified Triangle**

 Ramp Up and Ramp Down both maintain characteristics of the Triangle Waveform previously discussed

When used with the P3 devices
 Ramp Down has definite advantages for optimizing signal to better drive output

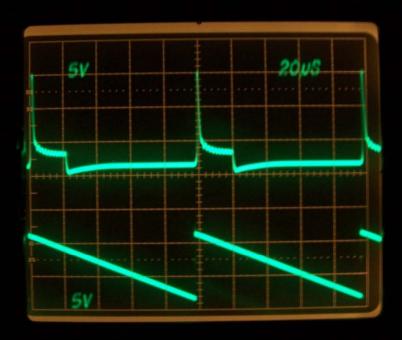

## Waveform Emission Strategy

Relative Visual Tube Output

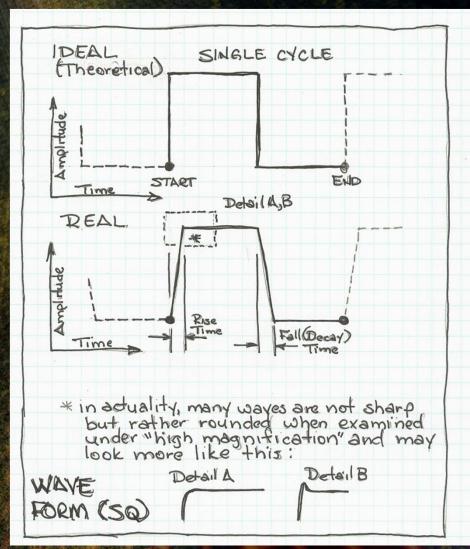

Bottom Trace - Function Generator Signal Output Top Trace - IR Sensed Tube Output

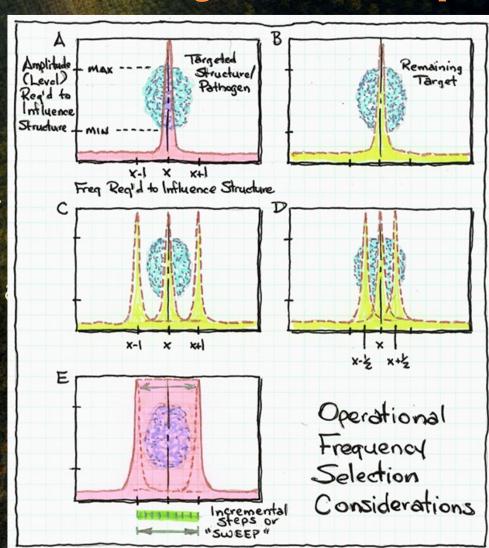

#### Waveform "Rise Time"

- Rise Time is a SUPER IMPORTANT characteristic when dealing with biological issues.
- Slow Rise Time is recognized by the body as a "foreign" signal and is filtered out by biochemical changes.
- Fast rise times and short duration pulses can pass across cell membrane while slower wave characters are ignored AND filtered.

# Frequency Accuracy / Sweeps

- First it is ridiculed;
- Second, it is violently
- Third, it is accepted

## GOOD Example of a BAD EXAMPLE

I am sure EVERYONE has seen some iteration of this MLM distributed device

- Market "Targets" the technically ignorant and Desperate
- Provides a "mindless" solution
- Constantly changes name to "protect the guilty"
- Has been sold as
   Electrospectrum, Quantronics,
   ScalarTronics, Infinitech,
   ElectroMagic, AstroPulse,
   NatureTronics, EnergyWellness,
   BioSolutions, Global Wellness
   (to name a "few")

Latest Generation is Global Wellness – Wellness Pro (pictured on right)

## Analysis

Careful / diligent examination and autopsy:

- Masked/hidden frequency library
- Limited to 550 frequencies
- Poor waveform performance = potential "effectiveness" issues
- VERY low frequencies
- Documentation and distribution channels contaminated with legal issues and liabilities

#### Hidden/Unknown Frequency "CODES"

- Meticulous testing and measurements with the proper equipment enable us to determine precisely what frequency is embedded for each "code" however these measurement capabilities are not typically available to most users.
- NOTE very low frequency limitations

#### A Little "Humor"

Unless it was you who had purchased the device!

CAUTION: OPENING CASE VOIDS WARRANTY AND DISABLES INSTRUMENT PERMANENTLY INTERNATIONAL PATENTS PENDING.

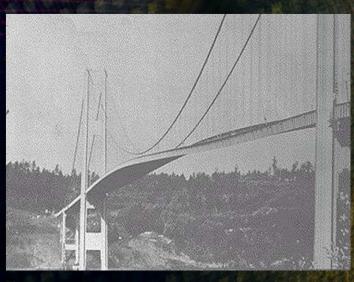

### Resonant Frequencies

- Every type of matter, molecule and cell has its own unique wave signature.
- To resonate something you emit a wave signature which is "in sync" with the wave signature of the material you are working with.
- The application of a constant resonant frequency to a material intensifies and reinforces the standing frequency of that material.

## **Destructive Resonance**

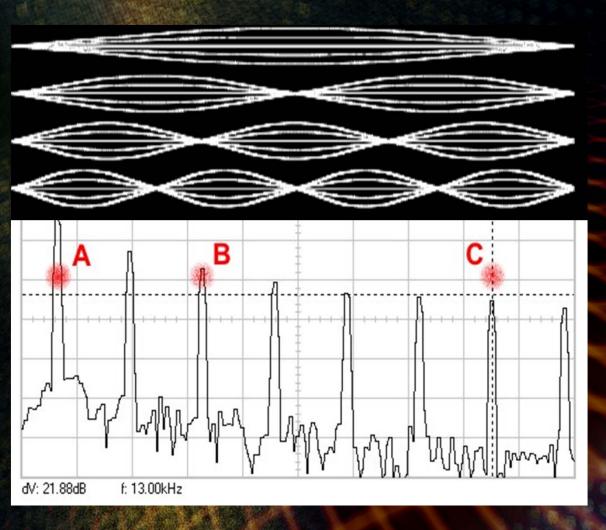

- Energy is coupled with another object
- Secondary object continues to absorb energy and enhanced movement continues with ever increasing energy absorbtion
- Structural failure results when energy/movement exceeds recipients capabilities

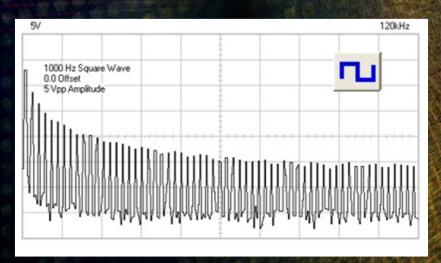

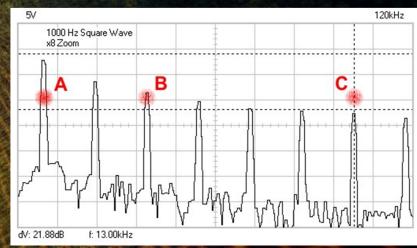

#### Harmonics

• A harmonic is a signal whose frequency is a whole-number multiple of the frequency of the reference or fundamental signal.

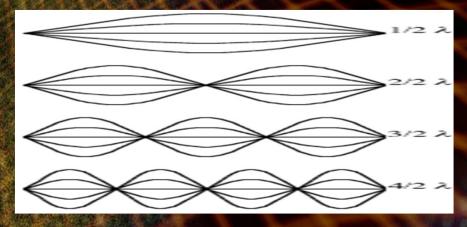

## **Emission Spectral Harmonics**

 The use of Square and certain modified waveforms allow for harmonics which can be clearly seen across the spectrum.

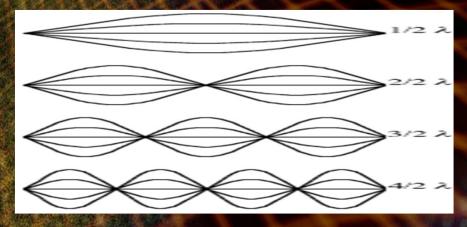

## **Emission Spectral Harmonics**

 The use of Square and certain modified waveforms allow for harmonics which can be clearly seen across the spectrum.

## Frequency AND Amplitude

 A certain level of amplitude is required to bring about an effect.

 Physical match or resonance of wavelength is where transfer of energy most efficiently takes place

- Coupling takes place in vivo or in vitro by conventional EM means
- Coupling ALSO likely exists by quantum means at atomic levels

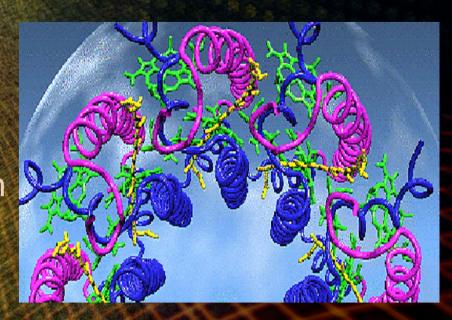

### **Molecular Antennas**

• In the body, every protein and nucleic acid has a specific length and molecular weight, both of these physical aspects can be used to

calculate the resonant frequency of a molecule.

 The length of an object can determine the resonant frequency of the object because of its correlation with wavelength.

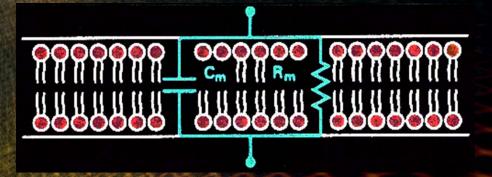

# Membrane Electrical Charge

Text1

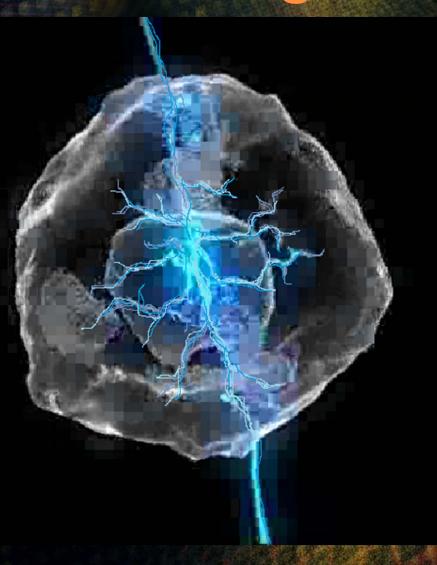

## "Charging" of Cell Membranes

 Multi-frequency delivery systems provide a range of electrical frequencies that will allow cells and their molecular components to match impedances and absorb energy at their resonate frequency.

• When energy is absorbed in the membrane the membrane potential will increase, which helps activate cellular mechanisms.

## Ultra-Short High Voltage Pulses

 Ultrashort Pulses "slip past" the cell membrane to deliver to internal structures.

www.PulsedTechnologies.com www.PulsedTech.RO

### Pulsed Electrical Delivery

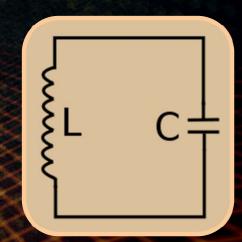

POWER PULSE: Bioelectrics experiments often use what are called Blumlein transmission line pulse generators, because they can deliver a nanoseconds-long pulse with the full voltage of a high-voltage source. The generator is made of transmission lines, that is, paired conductors [dark gray] sandwiching a dielectric [light gray]. The load, the cells to be shocked, sits in a break in one of the conductors, which is connected to ground. The device's other conductor is connected to a high-voltage source.

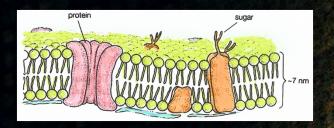

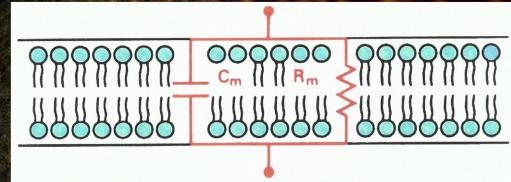

# Tuned (LC) Circuit - Tesla

- Parallel Tuned Circuits are used in radio, TV, and other electronics to couple resonant energy from one circuit to another in transmitters and receivers.
- The cell membrane and peripheral cytoskeleton also uses this same system to couple energy from cell to cell and into the cell

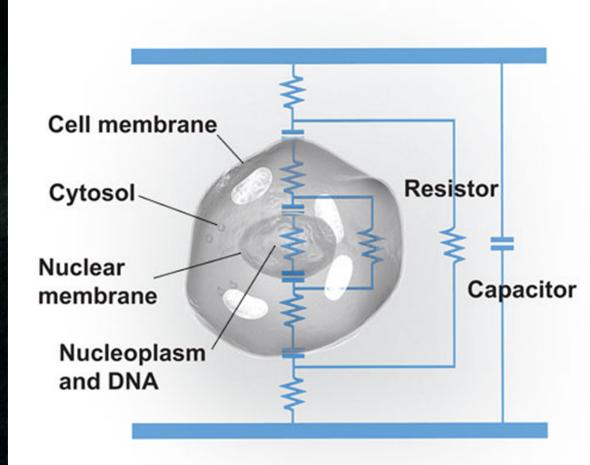

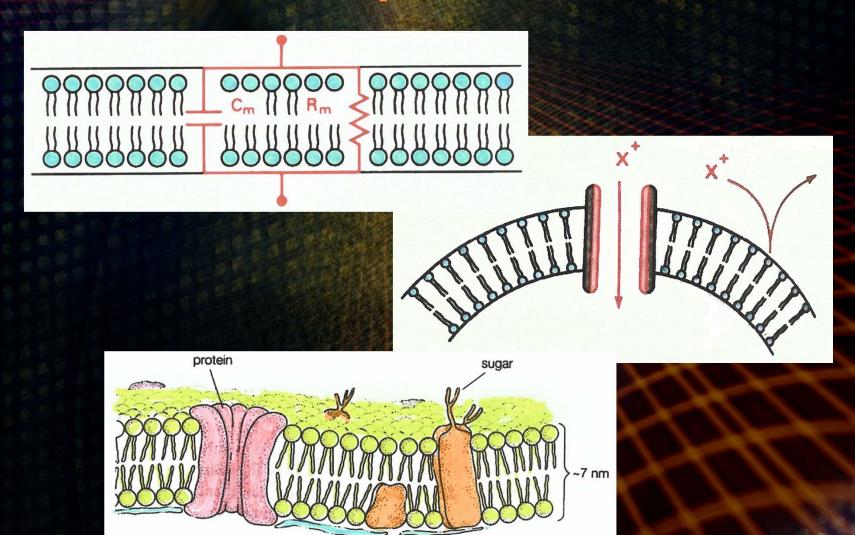

## **Equivalent Cellular Electronics**

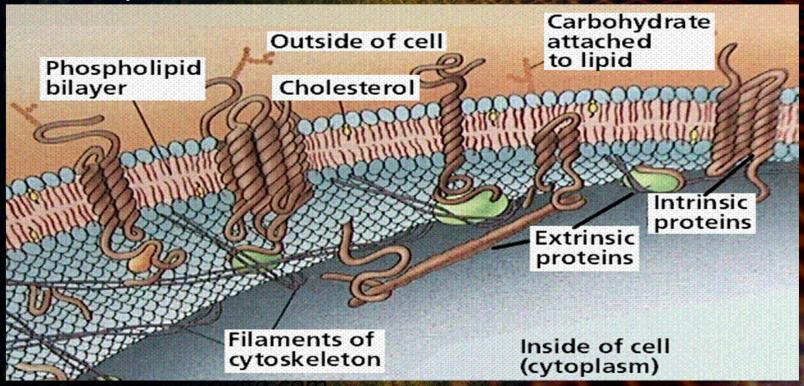

- Membrane & Organells act like CAPACITORS
- Liquid within the membrane, Cytosol & Nucleoplasm is conductive and resembles RESISTORS

### Membrane Capacitance

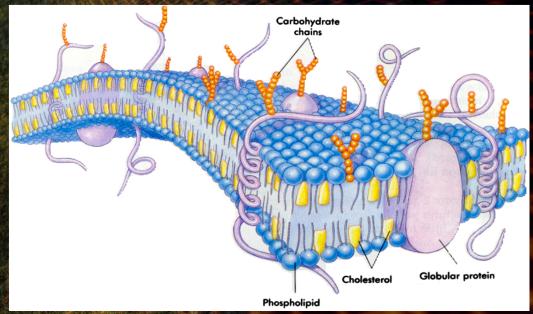

- Conformational changes in the membrane-receptor complexes initiate intracellular chemical reactions in enzymes bound to the cytoskeleton
- First messenger signals can be chemical, mechanical (needling), tensional (piezoelectric) thermal (moxibustion), acoustical (infrasonics), EMF (light lasers and LED phototherapy, radio waves, microwaves), magnetic and electrical)

#### **Membrane Electronics**

 Diet, presence of essential nutrients and type and level of toxicity play important roles in controlling membrane composition (structure) and Capacitance function.

 The cell membrane because of its structure has electrical properties that are involved in power transmission along the membrane

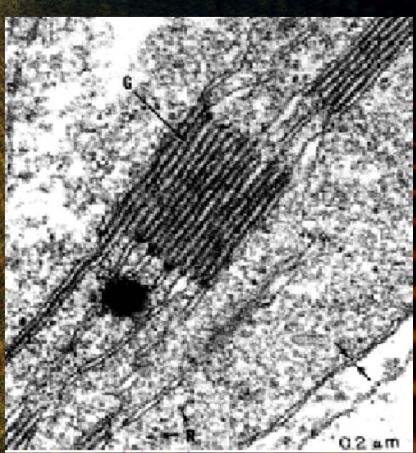

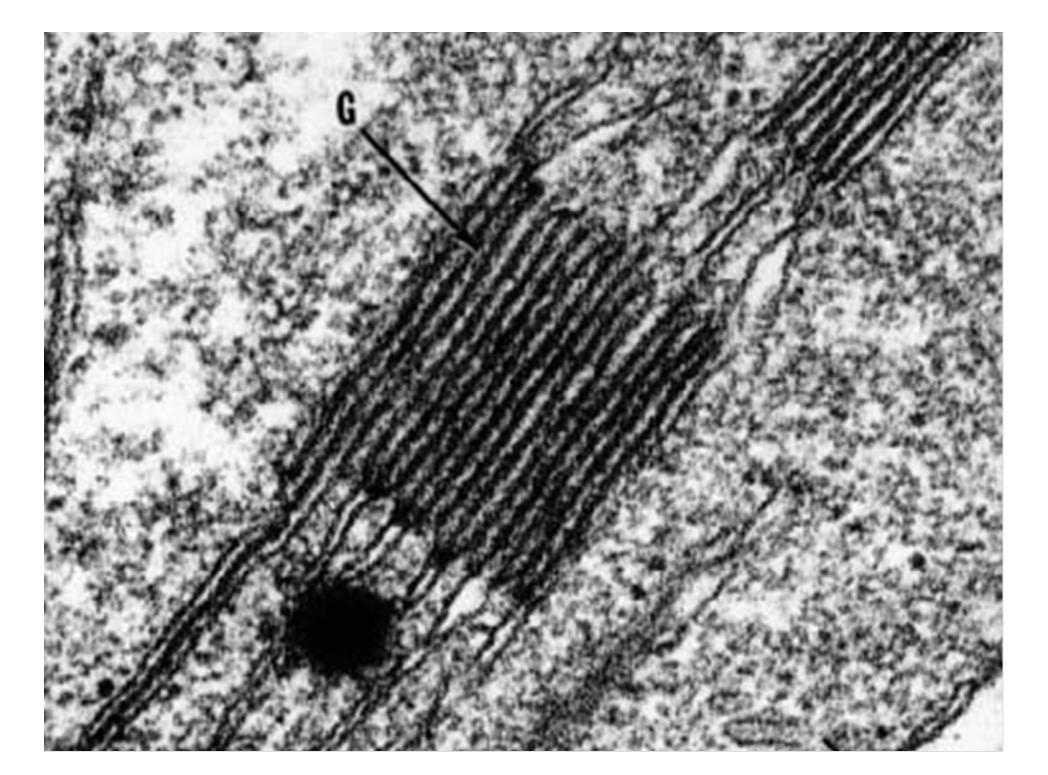

and energy transduction, which permits certain wavelengths of energy to initiate biological effects.

#### Cellular Components

NaturalSemiconductors

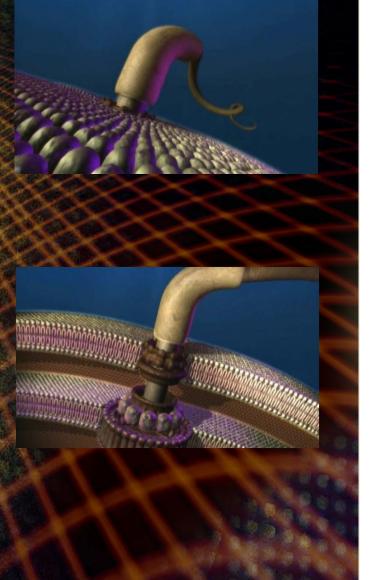

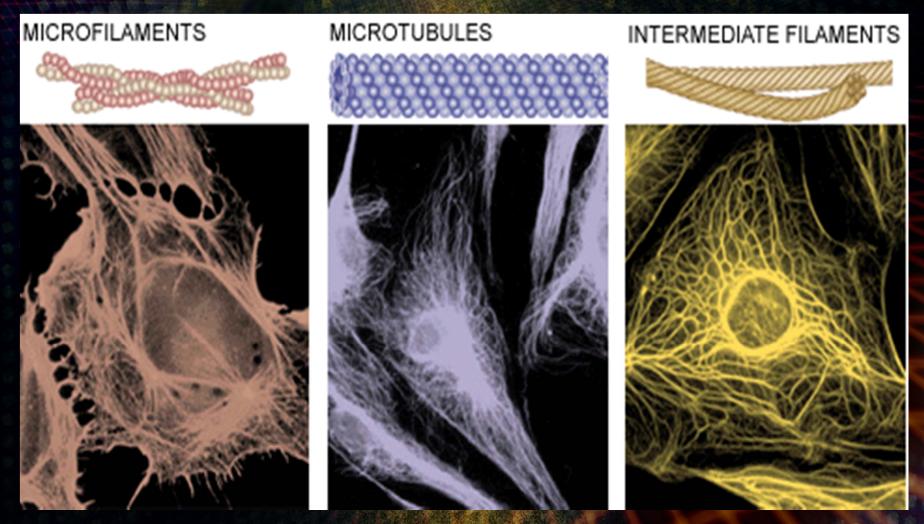

#### Irreducable Complexity

Structures such as the bacterial flegella are complex machines on a nano scale. In this case it is a water cooled ELECTRIC MOTOR with propeller drive system.

Interfibril crystal

### Targetable Molecular Bonds

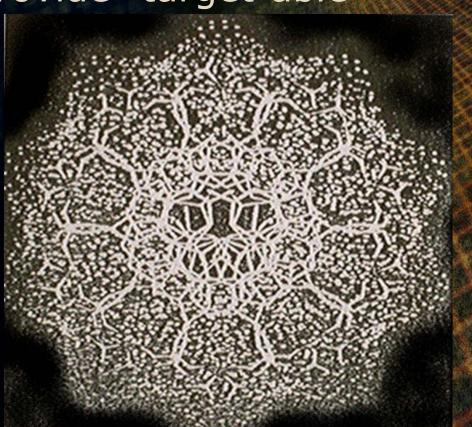

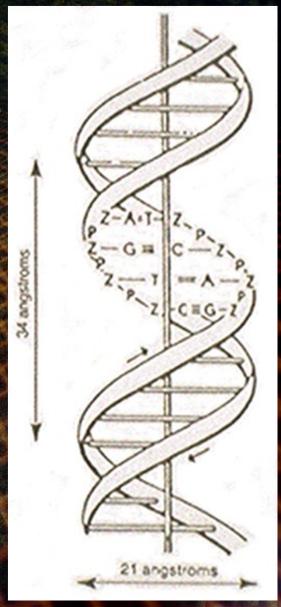

www.PulsedTechnologies.com www.PulsedTech.RO

#### DNA

 The physical DNA structures provide "target-able"

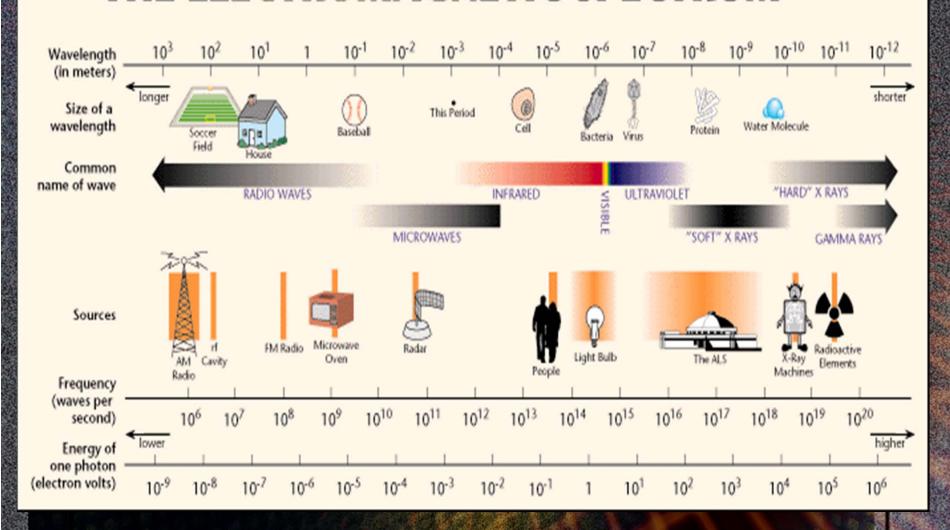

#### "Junk DNA" not Junk!

- Only 5% of the DNA strand is used for coding for protein reproduction. The other 95% of the DNA strand has been called "junk DNA" by some scientists. However, recent work by the Russian Academy of Science led by Dr. Pjotr GaIjajev, has discovered remarkable things about the junk DNA.
- Languages have a pattern called syntax. Syntax is the study of the rules, or "patterned relations", that govern the way words combine to form phrases and phrases combine to form sentences. The junk DNA contains proteins in a syntax that appears to be a biological language. Not only that, this portion of the DNA is a recording device much like a computer CD. It is capable of holding three gigabytes of information!
- When coherent light was shined along DNA in a test tube, the light spiraled around the DNA. When the DNA was removed, the light continued to move in a spiral! This has come to be called the "DNA phantom effect". This work was repeated with the same results by Vladimir Poponin at the Hearthmath Institute in the U.S.
- Garjajev discovered that that the language on the DNA could be changed with modulated coherent light or with radio waves by using the resonating frequencies of DNA.
- Even more stunning was the discovery that the DNA could be changed with spoken voice if the voice is modulated onto the correct carrier wave! The correct frequency is ultraviolet.

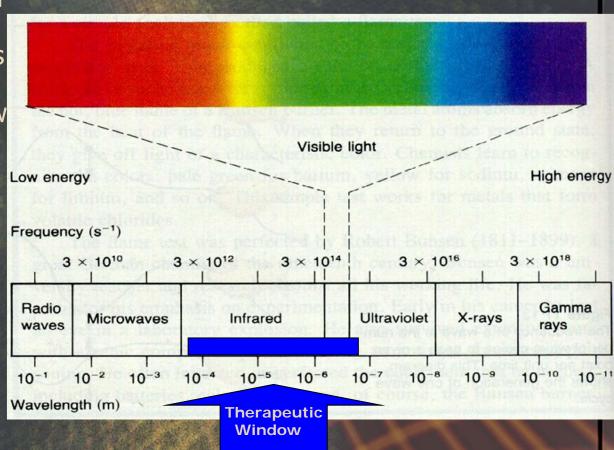

#### THE ELECTROMAGNETIC SPECTRUM

#### Therapeutic Window

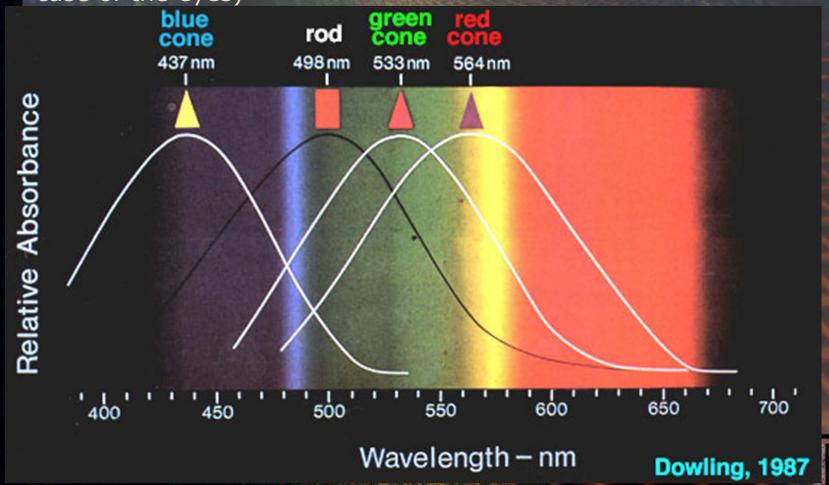

"positive"
biological effects
fall within a
relatively narrow
"therapeutic
window"

 EM Emissions outside this window can be relatively "devastating" to living bodies and processes

#### **Biological Absorption & Conversion**

 Different biological structures absorb specific wavelengths of energy and convert to other types of energy (electrical in the case of the eyes)

www.PulsedTechnologies.com www.PulsedTech.RO

#### Therapeutic Effects of Light

- In 1989 Jeffrey R. Basford, M.D. of the Mayo Clinic's Department of Physical Medicine and Rehabilitation, pointed out that the therapeutic effects of light therapy occurred both with lasers and non-laser light delivery systems. It is the basic properties of certain wavelengths of light that creates the effects (Basford, 1989).
- Wave-length dependent photobiological reactions that are well recognized and scientifically proven include: photosynthesis, vision, treatment of neonatal jaundice, and Vitamin D metabolism.
- It takes no great leap of imagination to recognize that certain wavelengths of light may also affect healing, pain control and anti-aging.

#### **Known Effects**

- Increase DNA and RNA synthesis
- Stimulate the production of collagen
- Stimulate the production of cellular energy
- Increase the formation of new blood vessels to replace damaged ones
- Increase lymph drainage
- Increase tissue repair by stimulating the activity of repair cells
- Modulate the activity of immune cells
   (Baxter, 1997)

#### LED vs. LASER

- They produce multiple combinations of healing wavelengths of light unlike laser devices, which produce light in fixed wavelengths "Laser light has shown some benefit for wound healing, but has limited surface area and wave lengths (Whelan et al., 1999)."
- They can treat large areas as opposed to the small areas that laser devices treat.
- They use advanced super bright LEDs that are capable of creating the right energy densities, light intensities and multiple wavelengths necessary for biological effects.

 Precision Pulsed LED Arrays may have many of the same characteristics & effects as do Pulsed Plasmas

#### **PPLED**

Precision Pulsed (high output) new generation of LEDs

Spectral output across "therapeutic spectrum"

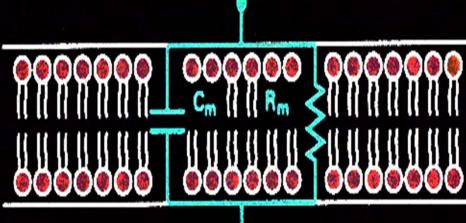

#### "Charging" of Cell Membranes

Healthy cells have an electrical potential across the cell membrane of about 70 - 100 millivolts. Cell membrane potential is often lower in disease.

(i) Persons who dispense devices to the ultimate consumer or whose major responsibility is to render a service necessary to provide the consumer (i.e., patient, physician, layman, etc.) with a device or the benefits to be derived from the use of a device; for example, a hearing aid dispenser, optician, clinical laboratory, assembler of diagnostic x-ray systems, and personnel from a hospital, clinic, dental laboratory, orthotic or prosthetic retail facility, whose primary responsibility to the ultimate consumer is to dispense or provide a service through the use of a previously manufactured device.

#### Q&A - Plasma/Contact Freqs.

- What frequencies should I be using?
- You can choose frequencies from the software's library or from other sources. Most frequencies publically available are below 10,000 Hz. However, we recommended running Higher Frequencies. Laboratory evidence CLEARY indicates higher frequencies are more effective. Precise waveform characteristics are also critical. This is also discussed in

greater detail in the "Frequency Generation Considerations" document.

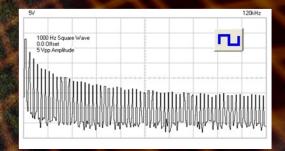

#### Q&A - Plasma/Contact Freqs.

 Higher Frequencies, as we name them, are harmonics (or multiples) of the lower frequencies, usually above 20,000 Hz. to well over 100,000 Hz. Pulsed Technologies equipment both plasma and contact operate in these regions of the spectrum.

 Most available (competitive) plasma equipment is of the EMEM type and has a vastly limited frequency spectrum

even less than the audio spectrum. Some claim 10-15,000 Hz but in actuality, effective emission is being stressed at only a few (3-4) thousand Hz.

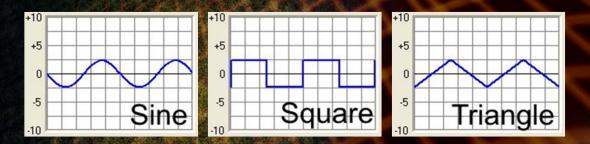

#### Q&A - Frequency Calculation

- How do I calculate Higher Frequencies?
- Simply multiply your base frequency with 2, until the desired harmonic. Example: base frequency 2727; 2727 x 2 = 5454; 5454 x 2 = 10908; 10980 x 2 = 21816. So, replace 2727 with 21816 Hz.
- There's an online calculator to help transform frequencies at: http://www.pulsedtech.ro/hfcalc/ developed by Pulsed Technologies ROMANIA.

www.PulsedTech.com/hfcalc/

#### Q&A - Waveform Function

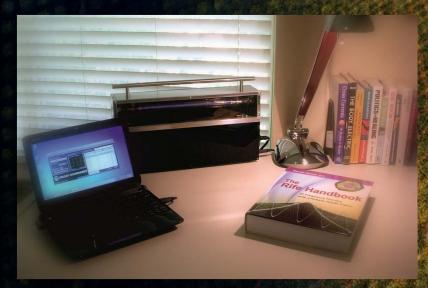

- What waveforms (function) should I be using?
- For the most part use Square. However the P3 works better when the function is "ramp\_dn". We recommend "ramp\_dn" when desiring to optimize drive to the plasma unit
- The scope and reasoning for this is beyond this Q&A but will be address more fully in illustrated documentation

#### Q&A - Device Placement

- Where should I place the unit?
- The P3 Plasma unit should be placed on a non-metallic table, desk or shelf. Avoid placing it on the floor, or in places where objects or liquid can fall on the unit.

The PFG contact unit can be conveniently located at or nearby casual work and relaxation areas. An extension cable is to allow provided for less restrictive use.

# Q&A - Plasma / Proximity

- How far / how close should I stay away from the P3 plasma unit?
- It is recommended one would stay nearby ... typically within the same room. Anywhere up to 50 feet (15 meters) or more is ideal
- Do I need to be in the same room with the P3/P3+ unit?
- Not necessarily. The waves/fields generated are apparently effective across rooms, through the walls. Within the same household should be fine.

## Q&A – Light Exposure

- Do I need to see or be exposed to the light?
- Not necessarily, however this might increase efficiency.
   Studies are currently being conducted on how much of the effect is actually caused by the light emission itself rather than other aspects of the energy emission and coupling
- It is becoming clearer that the light itself is not the mechanism causing the effect/s but may partially be the carrier of the energy and information

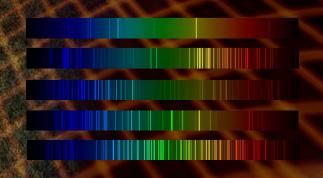

#### Q&A - Tube Breakage

- What if the glass/plasma tube breaks? Is it dangerous? Can it be replaced?
- This has happened only one time in over 10 (ten) years. If during operation, shut off the unit immediately, and do NOT try to repair yourself!. Pack the unit carefully into the box and send it to us. DON'T WORRY ABOUT IT!!!!
- We can replace the tube. Breaking the tube won't inflict any danger on you, (except the broken glass). All Pulsed Technologies P3, P3+, and P3pro designs use ONLY "inert" noble gases and NEVER contain ANY mercury, lead or anything harmful.

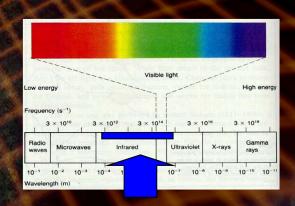

#### Q&A - Plasma Tube Gases

- What does the plasma tube contains?
- The glass / plasma tubes contain noble gases in a complex and proprietary mix: Neon, Argon, Krypton, Xeon and sometimes Helium, thus assuring a wide and complete spectrum generation. Each of these gases are among the most stable of elements and chemically inert.
- The glass itself is known as Pyrex, a pure non-leaded glass.

#### Q&A - Plasma Tube Emissions

- Are there any harmful UV emissions from the P3's plasma tube?
- NO. The P3's spectrum is carefully designed to maintain operation within safe limits. The Therapeutic Window extends to both sides of the visible light spectrum into BOTH the infrared as well as the ultraviolet.
- The emitted spectrum does not extend so far into either range far enough to enter the (human) biologically harmful areas.

# Q&A - Tube Longevity

- How long should the plasma/glass tube work?
- The plasma/glass tube itself has an exceptionally long life and should provide many years of service even under heavy use
- There are plasma systems built over ten years ago still in daily operation. All known P3 plasma systems manufactured to date are apparently still in operation

 The plasma tube contain "getters" which electronically, at the atomic level, attach to and absorb impurities that have worked their way into the tube over time

#### Q&A – "How Long"?

• How long should I run the unit/frequencies?

 Less is generally better than "overdoing it" Use it for how much you feel necessary or beneficial, don't overdo it. If it makes you feel BAD .... THAT is "too long"! (It also typically means it IS WORKING!)

oenergetics Session Consideration

 We recommend you to refer to the document Bioenergetics Session Considerations (PDF, 4.7MB) for more information.

 Usually, running individual frequency from 120 seconds up to 300 seconds should be enough. Individual scripted sessions, even in severe crisis scenarios typically 1-2 hours total.

#### Q&A – Frequencies & Time

- I have too many frequencies and my sessions take a lot of time to run, what should I do?
- Using the Higher Frequencies Calculator (URL below), will identify duplicate harmonics even if the base frequencies are different. You can also split frequencies and determine which frequencies are more efficient. Do not neglect the others

www.PulsedTech.com/hfcalc/

#### Q&A - Frequency Sweeps

- What are sweeps? Do I need it?
- Sweeps are useful for more limited equipment. They are ultimately not desirable for the most effective results. We have learned that, when using Higher Frequencies, there is much less the need for sweeps. For lower frequencies you can create frequencies close to the base frequency, within 1 or 2 Hz range. Example: base frequency 2727. Use the following frequencies to emulate sweep, by adding or removing 0.5Hz from the base frequency: 2726, 2726.5, 2727.5, 2728. The recommend higher frequencies would be: 21808, 21812, 21820, 21824, 21816 (calculated using the Higher Frequencies Calculator)
- This important issue will be discussed in detail in the Bioenergetic Session Considerations document

#### **Q&A - Documents**

- Where are the documents located?
- All the documents referred to here, including this one, are freely available on the on the Pulsed Technologies website as well as the provided software CD.

http://www.PulsedTech.com/download.html

# Q&A - FailSafe System

- My P3/P3+ interrupts while running a frequency.
   What should I do?
- The most probable cause is the core overheating and there's an automatic fail safe system that turns off the unit to cool down.
- What can you do:
  - Assure the unit has proper ventilation and that the end caps are not covered.
  - Move it away from heat sources.
  - Adjust the offset (if your PFG device allows for programmable offset adjustment; PFG2X does not)
  - Change the waveform/function (square, ramp\_dn or other)

#### **Q&A – Electrode Placement**

- Where do I place the electrode pads.
- This is a strategy best prepared between the practitioner and the client although many practical examples may be given in accompanying documentation.
- There are many variables to consider, however strategic placement can affect exceptional results where casual placement may still be effective but at a less accelerated rate.

#### Q&A - Direct Application

- Should I apply electrodes directly to a "problem" area
- Most situations are well served by application over a wide area HOWEVER ..... Sometimes pathways are impeeded by scars or toxins which may prevent signals from getting to the "target" areas.
- Localized placement with the path between electrodes traversing the target pretty much assures direct and successful delivery of signal.

#### Q&A - Tingling / Feeling

- What if I don't feel anything, ... Is it working?
- CONTACT APPLICATION In direct contact applications it is likely you will feel something at lower frequencies although as you go higher in frequency you may feel little to nothing at all ...even at full power. It is not that the signal is low, it is simply because the body has no sensation at these higher frequencies.
- Note: If you feel the unit might not be outputting, shift to a low frequency at medium to high power to test. Lower frequencies should most definitely be able to be felt as a strong tingling sensation
- PLASMA APPLICATION Typically you will have little to no sensation at all although many people can most definitely feel certain frequencies as they physically resonate with targets or "disturb" target pathogens.

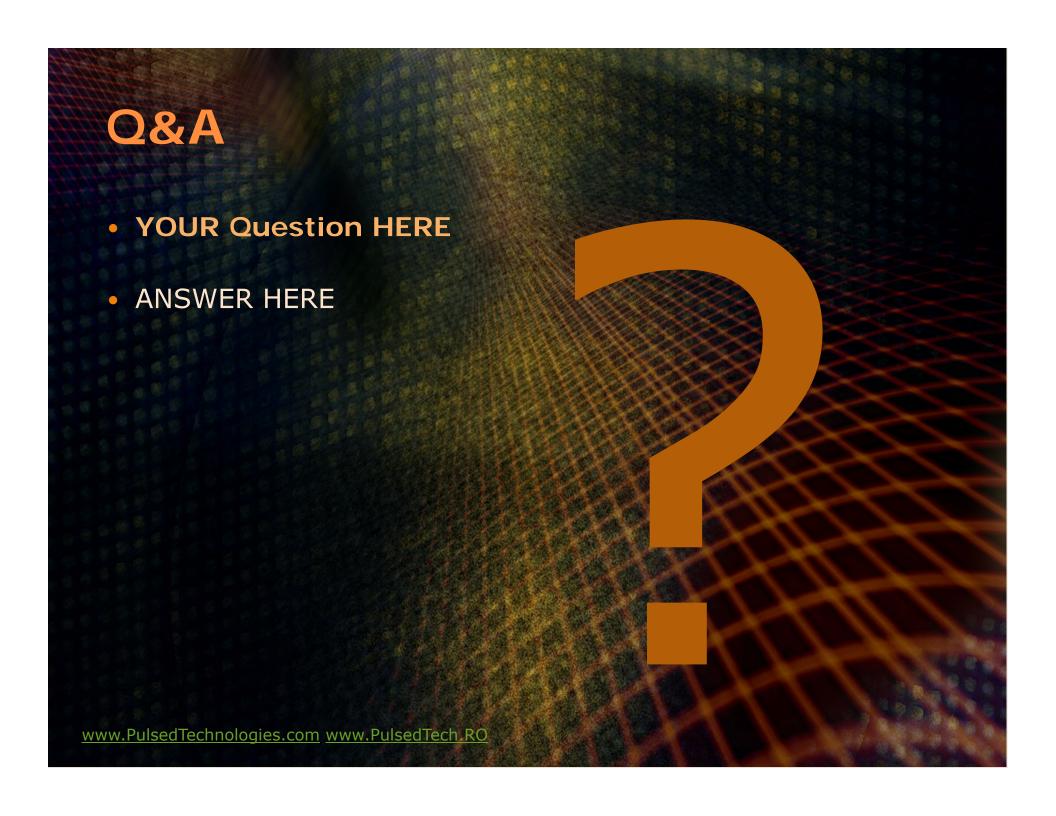

#### Q&A - Detox & Herx

- How do I minimize the reactions
- Most of the Detoxification /
  Herxheimer reactions can me
  minimized or eliminated completely
  via keeping the body flushed as the
  application process is going on.
- Simply drinking plenty of CLEAN, FILTERED water goes a long way in this process.
- Additionally a bit of activated charcoal also helps absorb toxins released in the process.

#### **Q&A** – Retarded Recovery

- What are some of the issues which contribute to "slow recovery"?
- Toxicity foods, smoking, alcohol, pesticides, pharmaceuticals, dental, chemo
- Subject Compliance not following directions, not using recommended supplements
- Organ Dysfunction physical damage, chemical, congenital
- Malnutrition/Cellular Chemistry supplementation, diet
- Geopathic/Electromagnetic Stress environment
- Misc. Age, congenital, compromised immune, lack of family support
- Others ??????????

#### PRACTITIONEERS APPLICATION

Show the contents of the package

Install Software (custom software versions may be made available to certain practitioners)

Show how cable connections are made

How to enter and run your first frequencies

Calculation of frequencies

Proprietary method of calculation – NDA???

How to make a protocol for a treatment, group, or reuse

Timing considerations

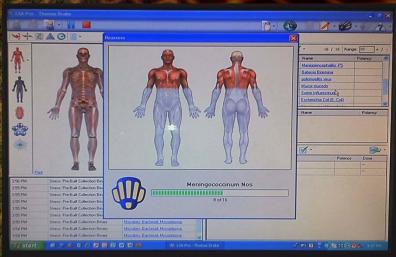

Practitioners' unique needs and problems

#### **Practitioner Assessment**

 Practitioner assessment aids such as the available Zyto system can be instrumental in quickly determining needed "frequency supplements" and targeting applications or protocols.

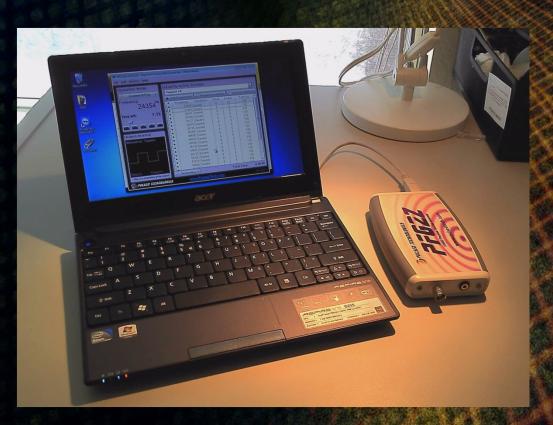

#### **Practitioner System Candidate**

 Inexpensive quality netbook computers provide an excellent platform for client "rental" or "loan" use as part of an ongoing strategic protocol

#### **Practitioner System**

- Relatively Inexpensive
- Very Portable
- CUSTOMIZED to practitioners business model/client needs
- Remotely accessible and controllable by practitioners office/technician
- Can be universally used on any PT devices

#### **CUSTOMIZATION**

- Business logo/icon
- Splash screen
- Contact information
- Embedded instructions and reference notes for client
- Practitioner controllable libraries
- Access to PT private libraries
- Remotely modifiable

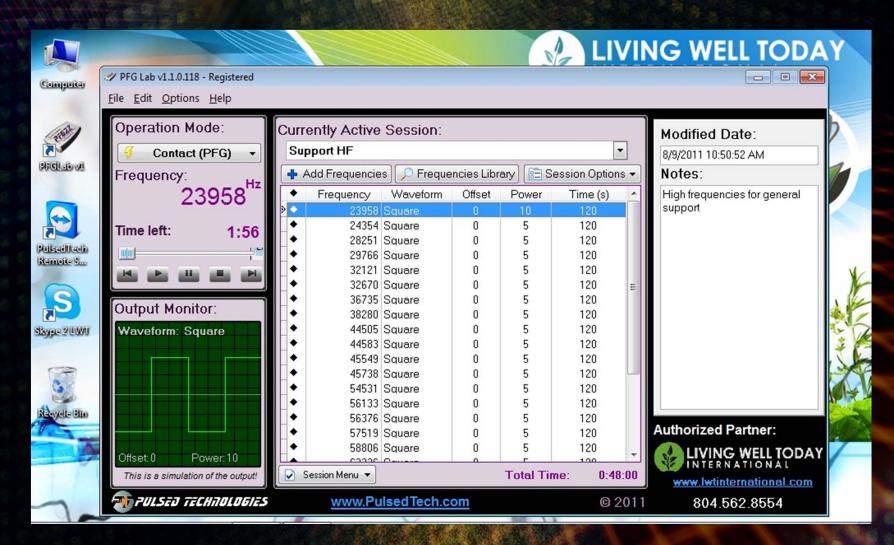

- Remote Support/Control
- Video Calling/Visual Exam
- Default Website
  - Practitioners written Instructions and Notes
- Contact Information & Scheduling

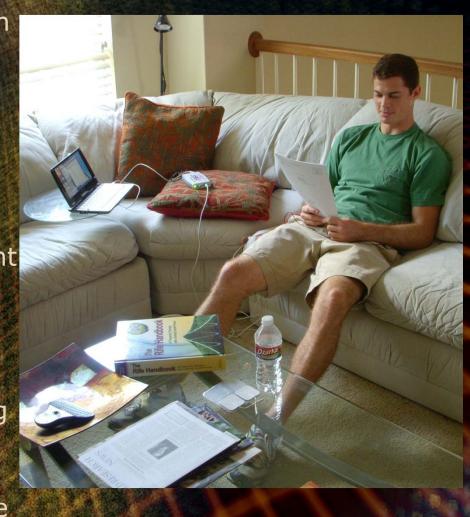

#### **Custom Branded Software**

#### **End-User Application**

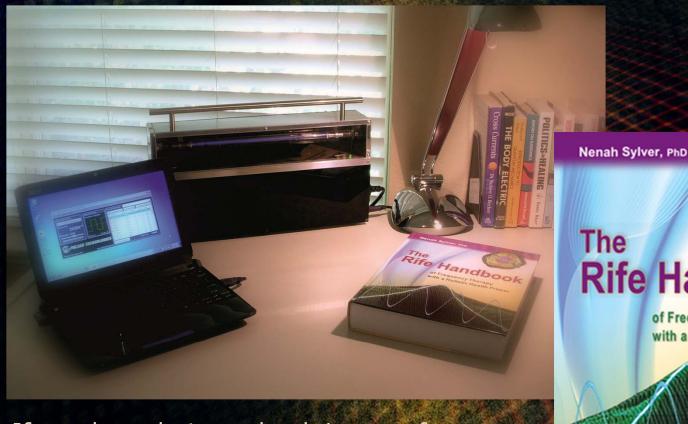

- Client can use preprogrammed system in the privacy of their own home
- May be utilized while reading, watching TV etc. so as to minimize impact on daily schedule
- Daily protocol commitment and regular reporting and/or feedback to practitioner can be done on the clients schedule
- Data and comments being "collected" via txt messages at the practitioner office can be addressed on his schedule

#### Important Application Notations

- Most serious client situations cannot be helped with only "occasional/irregular" office visits
- Required daily commitment and regular reporting and/or feedback to practitioner can be performed without office visits or can "red flag" when an office visit is needed.
- Irregular and/or nonconsistant use by client can be DETRIMENTAL in pathogenic situations stimulating the development of mutations of the pathogenic organisms
- While mutations CAN be, (and often are), addressed within the proprietary protocols, response time is better and more complete when a diligent and consistent protocol is adhered to.
- Practitioner has access to the HISTORY of last 10 session uses of device indicating when/what was used by client.

# Operating Strategies & Considerations

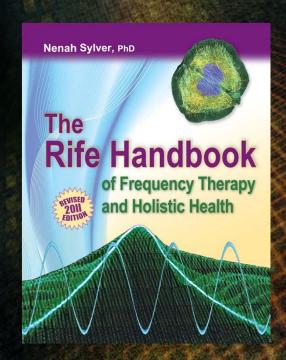

If you have but one book in your frequency therapy library .... THIS should be the one!

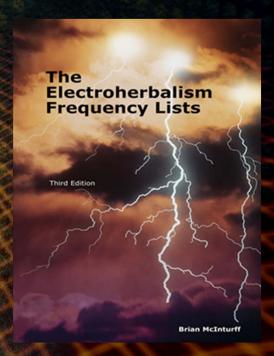

The Rife Handbook

of Frequency Therapy with a Holistic Health Primer

# **Frequency Selection**

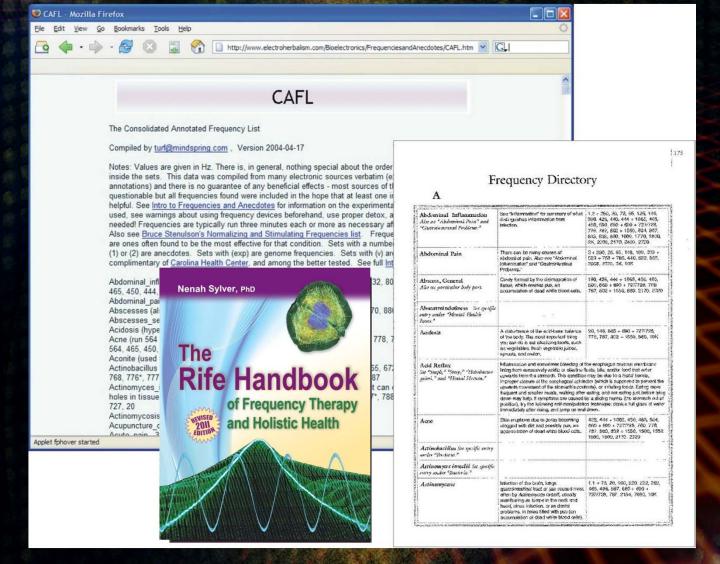

Publicly
 available &
 accessible
 frequency
 resources

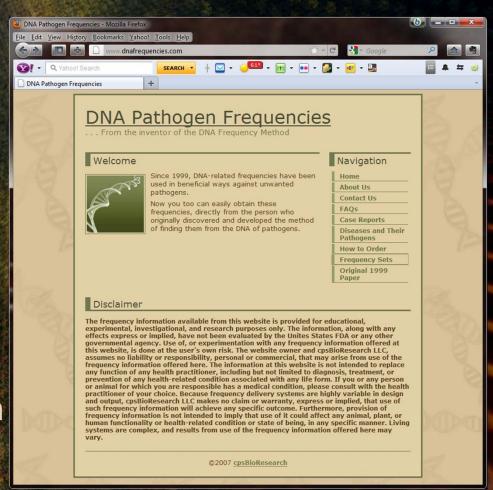

• Good STARTING POINTS !!!

# **Frequency Starting Points**

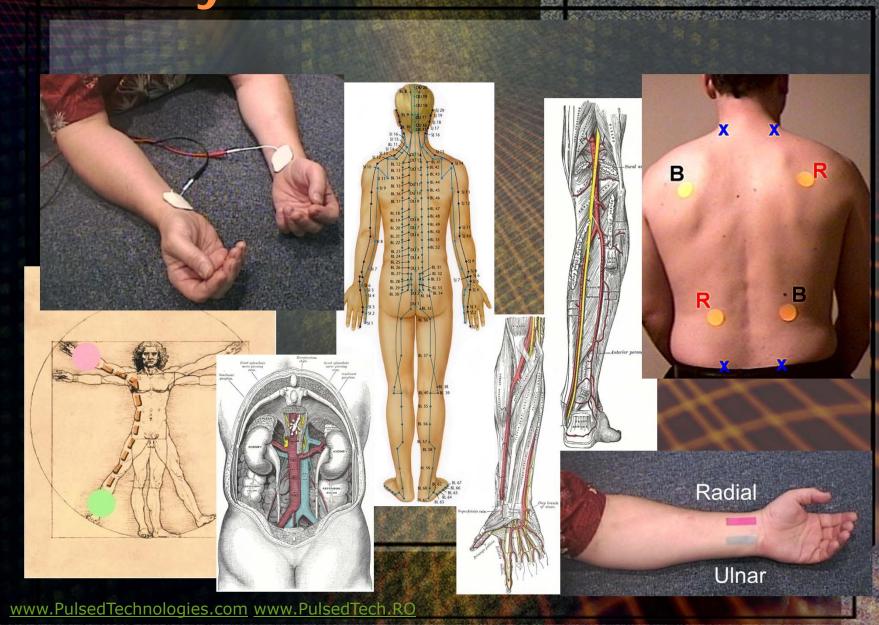

#### Calculated Frequencies

- Specific pathogen MORs can be calculated based on a patented method as an available service.
- Specific targeting can be invaluable when dealing with known pathogens

www.DNAfrequencies.com

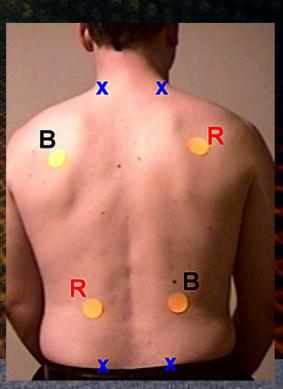

# **Delivery Considerations**

#### Delivery - Electrode Placement

 Multi-frequency delivery via contact method allows for convenient localized targeting or general systemic application with planned logical placement for intended use

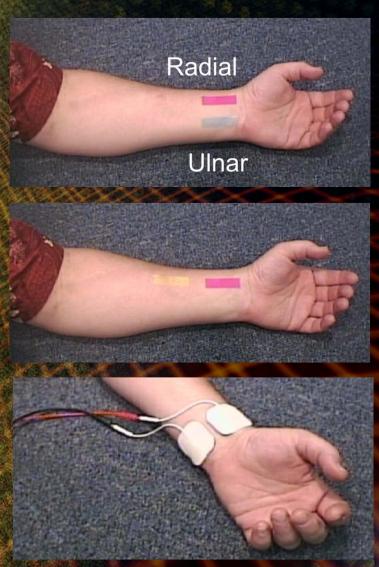

Radial

Ulnar

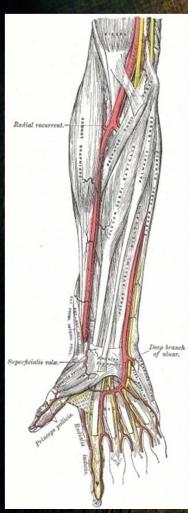

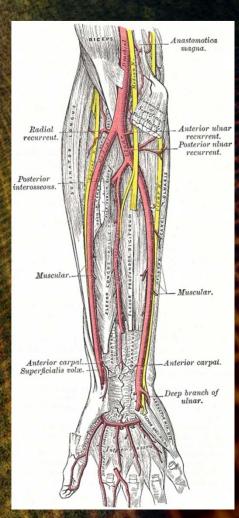

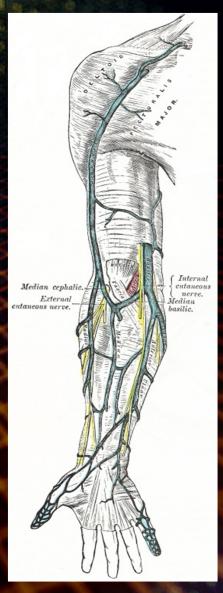

www.PulsedTechnologies.com www.PulsedTech.RO

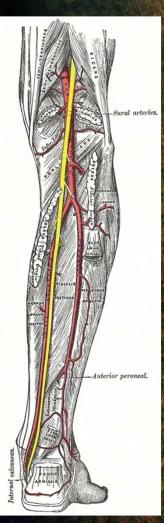

Strategic use of highly conductive circulatory system as electronic pathways

 Multifrequency delivery to targeted areas of the body may be provided via strategic use of highly conductive circulatory system

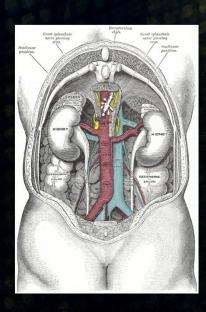

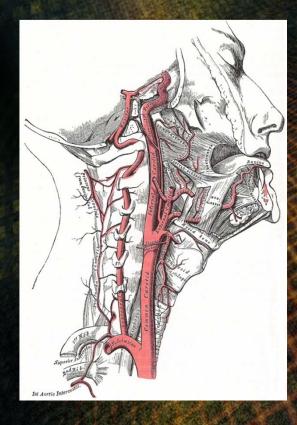

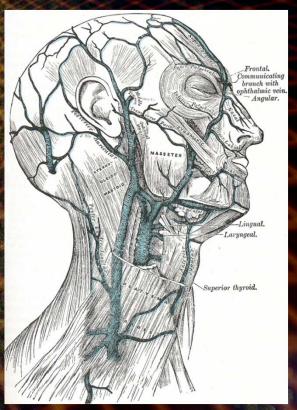

DO NOT apply electrodes to the HEAD OR HEART

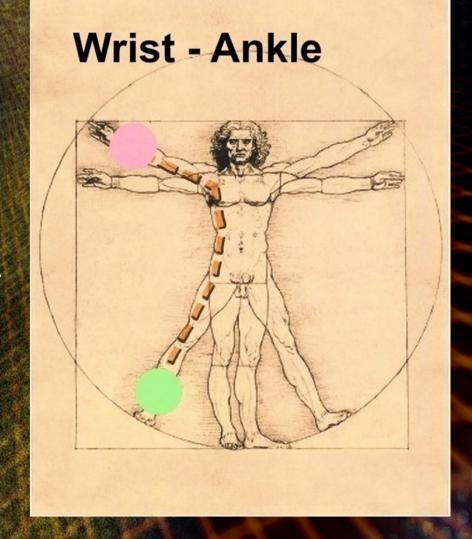

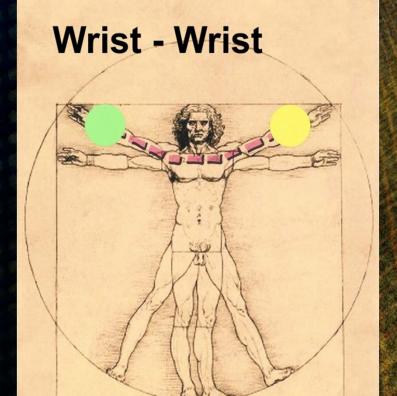

## Overall Body Placement

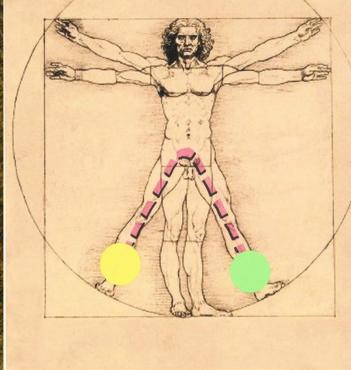

- Strategic electrode pad placement can accomplish large area of body coverage while largely avoiding certain key areas.
- Careful planning for clientspecific needs can be addressed wile still offering optimal signal delivery.

Excellent "upper-body" targeting

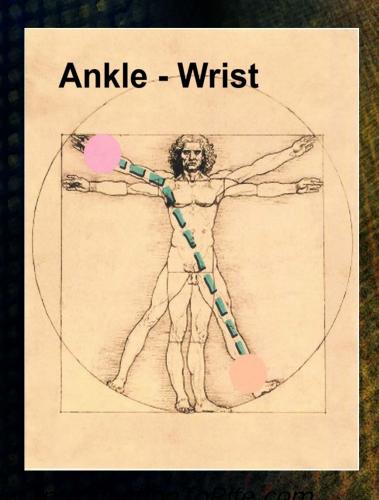

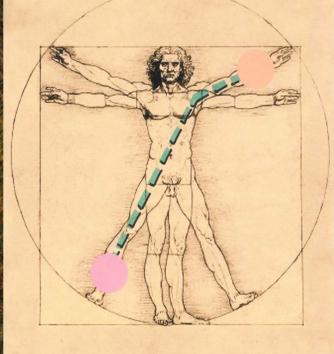

Excellent "lower-body" targeting

Best "full-body" coverage

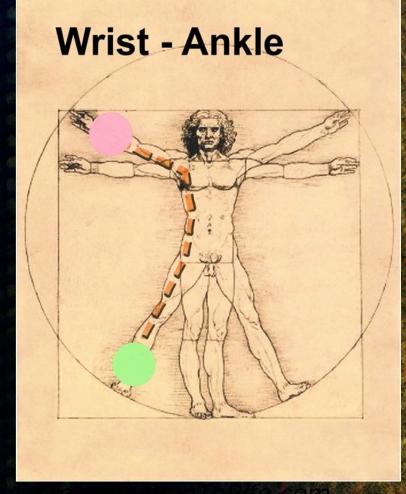

#### Ankle - Wrist

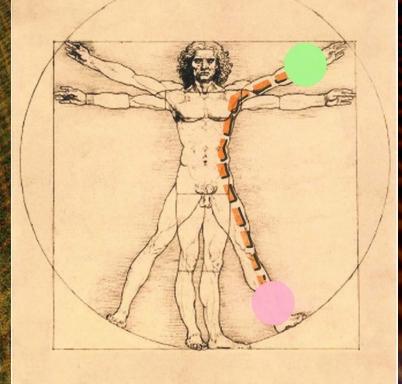

"Least Recommended" Scenerio (a lot depends on the person, the power level, and what is actually being addressed)

www.PulsedTechnologies.com www.PulsedTech.RO

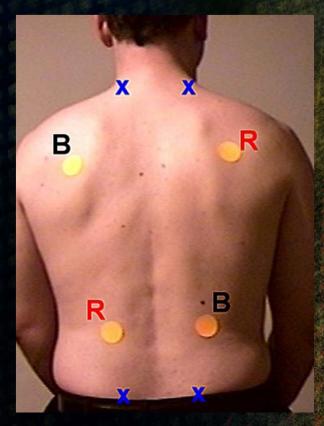

Strategic placement for localized focus

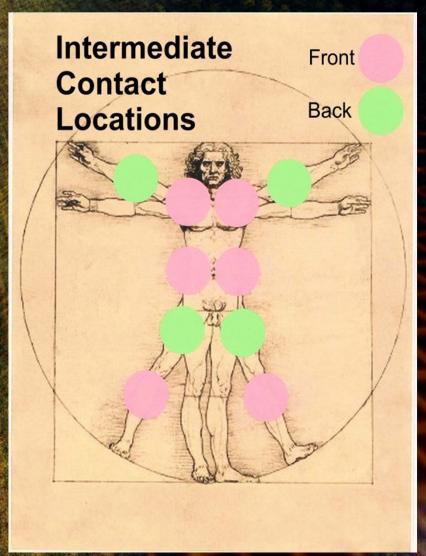

#### Wrist - Ankle

 Alternate/Intermediate contact points can be used for even more strategic localized targeting

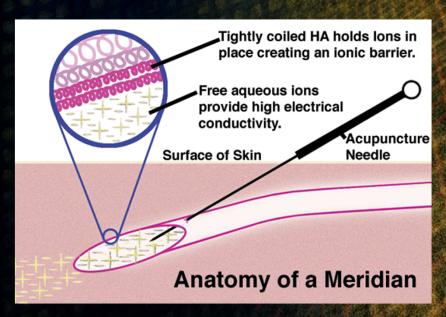

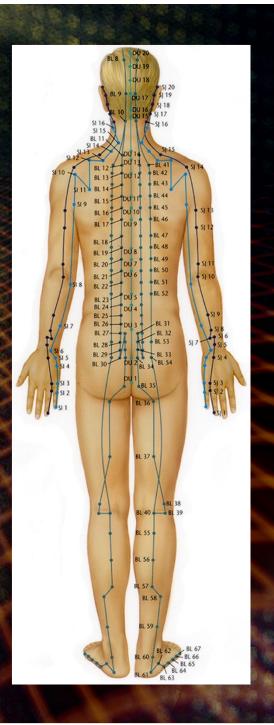

### Conductive Meridian

## Accupuncture Meridian System

 Knowledge and utilization of the meridian system and be utilized for very effective Multi-frequency delivery to localized targeted area even using the simplest contact equipment.

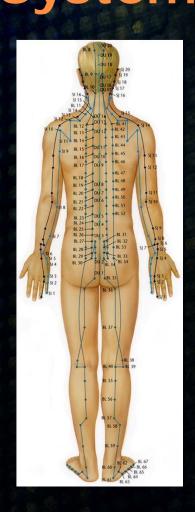

Critical points corresponding to strategic locations can be located and individually targeted with precision frequency application

# Meridians of Accupuncture System

 The Hyaluronic Acid (HA) binds water and ions to create electrically insulating tubes within which free aqueous ions provide highly conductive pathways .... like...

nsulation covered copper wire

- Highly electrically conductive media
- Excellent Fiber Optic system
- Directly connects to all key organs of the body. (provides knowledgeable practitioner direct access to particular target organs/systems
- Electrically held together (Disappears immediately at death)

#### Nuclear Medicine & Acupuncture

 The meridian system has been mapped using conventional nuclear tracing techniques.

Some of these papers have been included

Ex Libris Jimmie L. Holman

Prepared by BioMeridian<sup>TM</sup>

#### Abstract #3

Nuclear Medicine and Acupuncture:
A Study on the Migration of Radioactive Tracers after Injection at Acupoints

American Journal of Acupuncture, Vol. 20, No. 3, 1992

Writers: Jean-Claude Darras, Pierre de Vernejoul, and Pierre Albarède, C.H.U. Necker-Enfants Malades, F-75 743 Paris Cedex 15, France

Objective: This paper reports on the authors' investigation of the pathways of acupuncture meridians in the human body through the injection of radioactive tracers (isotopes) at acupuncture points.

Design: The radioactive tracer used was the most common radioactive tracer, techetium-99m (\*\*"Tc), as sodium pertechnetate. The experiment was conducted with a gamma camera, a Siemens SAM (small-area mobile) digital scintillation camera. Image analysis was conducted by a computer system built into the camera. Morphological studies and quantitative dynamic studies were conducted.

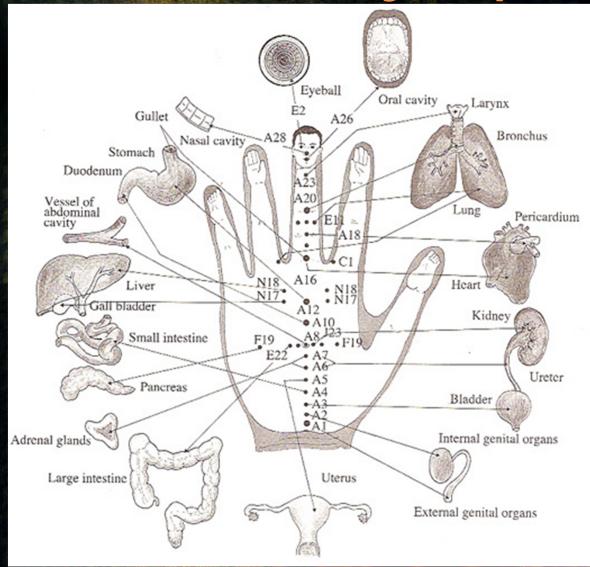

The morphological studies consisted of analytical and differential studies. For the analytical studies, the radioactive tracer is injected at a control point located outside any acupoint. Then, another injection is given at an acupoint.

The differential analysis was conducted in order to establish the specific and unique characteristics of the pathways observed in the analytical studies and thus eliminate a vascular or lymphatic explanation. To investigate the vascular pathways, two radiotracers of different energies and therefore discernible by spectrometry were utilized: Technetium-99m was injected as an acupoint and Thallium (<sup>201</sup>Tl) was injected in a small vein situated next to that acupoint. To study the possible relationship between the lymphatic pathways and those demonstrated by the radiotracer, the same dose (20 MBq) and volume (0.05ml) of pertechnetate was simultaneously injected at an acupoint and the first interdigital space of the foot. A quantitative study of the previous data was conducted after selecting two mirror regions of identical shape and size on the leg along the Liver meridian (an acupuncture meridian) and similar "background noise regions" outside the pathways.

Sequential study and stimulation studies were conducted as part of quantitative dynamic studies. The goal of the sequential study was to evaluate the speed of radiotracer migration along preferential pathways. In healthy control subjects and patients with unilateral renal pathology, two sodium pertechnetate injections of identical volume and activity were given simultaneously

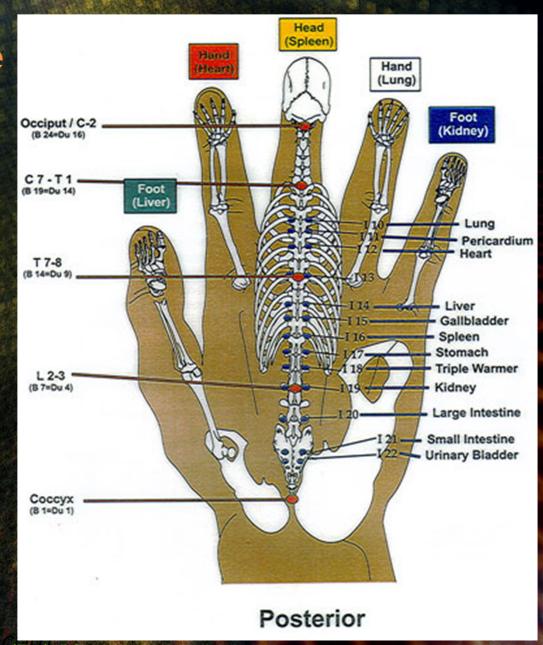

#### Acupuncture Points - Body Map

 Use of the meridian system allows for "direct wiring" directly to specific target organs and systems

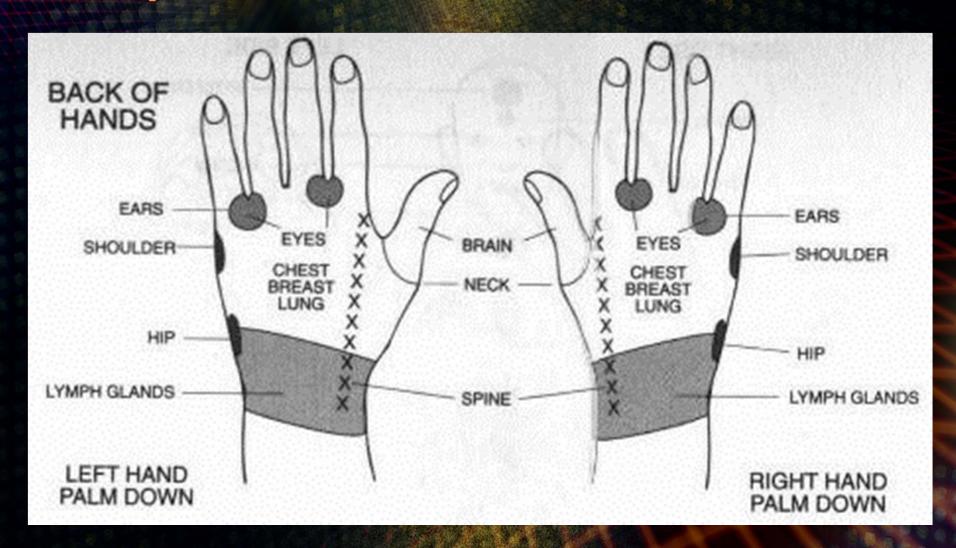

# Acupuncture Points – Body Mapping Hand

 The general full body is mapped within these "end points".

#### **Acupuncture Points - Hands**

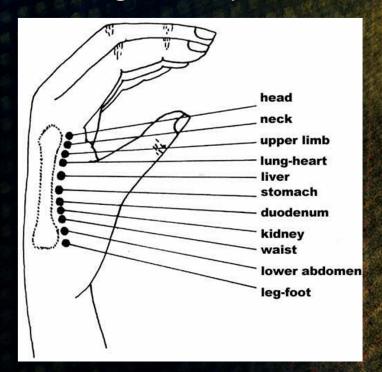

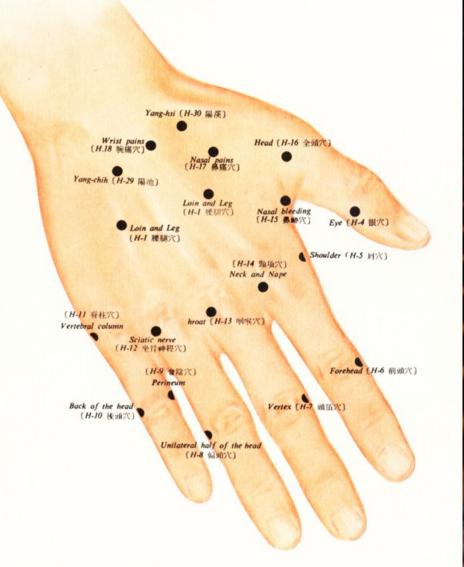

#### **Acupuncture Points - Hands**

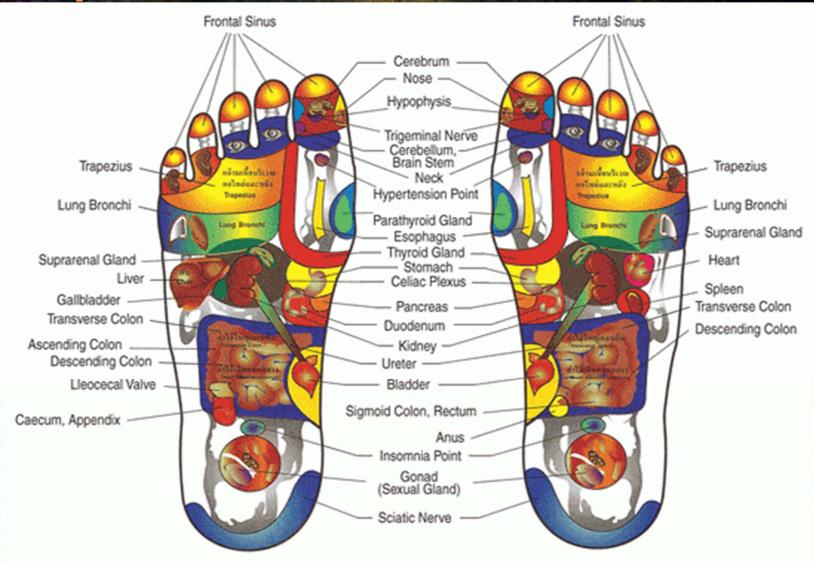

#### **Acupuncture Points - Hand**

 The meridian system has been mapped using conventional nuclear tracing techniques.

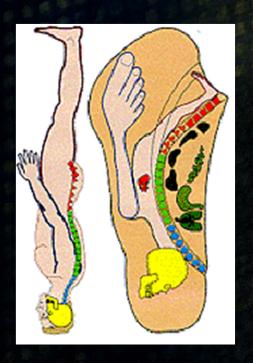

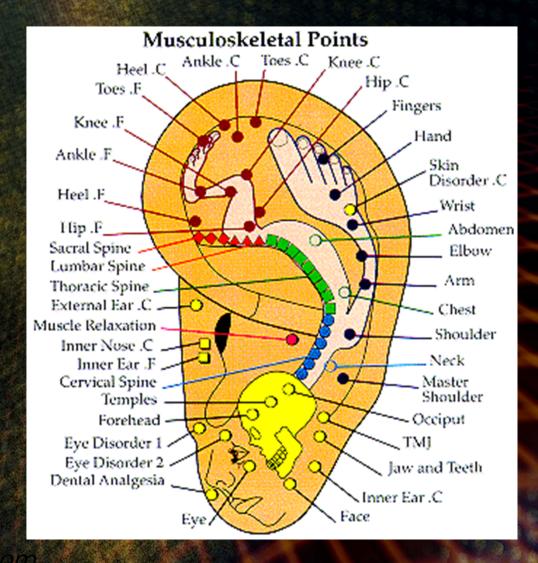

#### **Acupuncture Points - Feet**

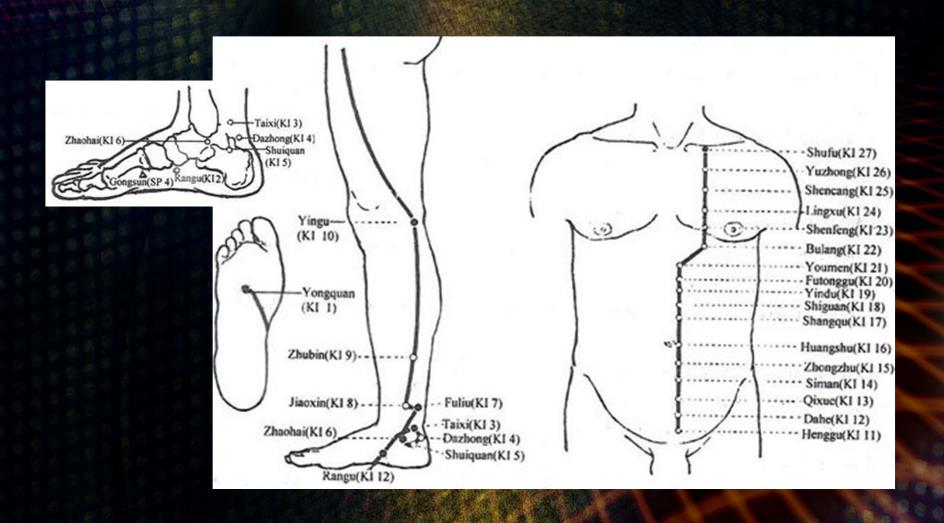

#### Acupuncture Mapping - Hologram

 PFG Electrode placement is NOT recommended on the Head or Ears but MAY be utilized for PPLED and Plasma application

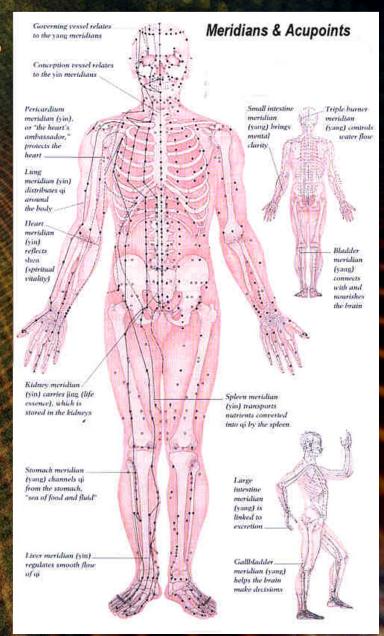

#### **Acupuncture Points - Kidney**

#### **Acupuncture Points**

 Detailed books and charts are available but simply knowing and utilizing a few of the major connection points can greatly enhance the usability and effectiveness of any of Pulsed Technologies devices.

#### Hand or Foot Bath

 The indirect distributed contact via heavily salted conductive water provides simultaneous conductivity through all meridian points.

#### **Electrode Connection**

- An ideal operating position ... note conventional adhesive electrode on wrist becomes the other end of the circuit
- Theoretically, the path will be from the immerseable electrode, through the water to each of the acupuncture meridian points on the feet, then on through each of the key corresponding organs via the meridian system, with the final destination being the conventional electrode.

MALATE

#### ICS

- Colloidal Silver itself is known to act as a catalyst by deactivating the enzyme one-cell bacteria, fungi, and simple microorganism utilize for oxygen metabolism.
- This is accomplished by attaching to the cell membrane of the bacterium, fungi, virus or organism preventing the oxygen metabolism enzyme form essentially "breathing" ... in simplistic terms suffocating the pathogen to death.
- This can only occur if the atomic cluster size is small enough to physically attach to the microscopic enzyme receiver structures. (MOST of the typical selfmanufactured solutions do NOT fall into this category)

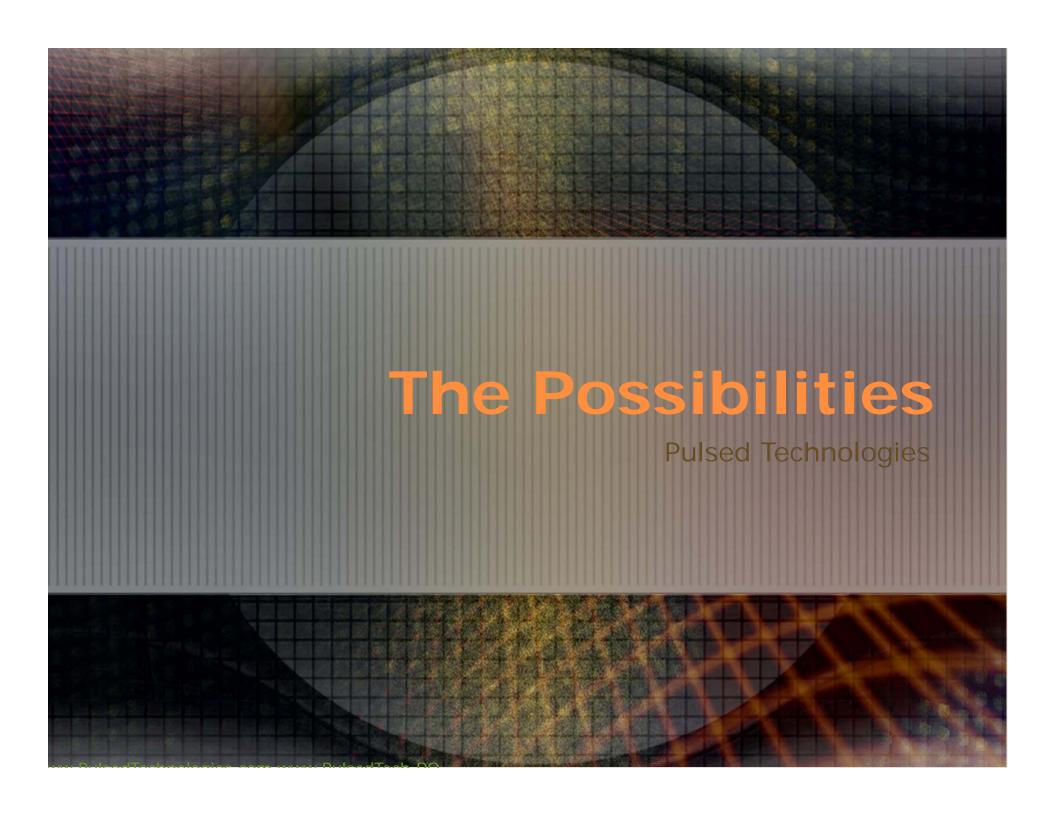

### ICS - Tyndall Cone

- This "laser test" is probably the most often recommended by and for novice experimenters because it can be easily visualized. A "typical novice" colloidal solution will indicate a distinct beam through the solution while simple distilled water will not.
- You are actually viewing the reflections from the silver particles in solution. This effect is called the "Tyndall Effect" or Tyndall Cone
- The reflected beam to cause this visual effect mandates the silver particles to be of significant size, actually much larger than desired to bring about desired biological effects. An ideal solution will show little or NO Tyndall Effect but will still record substantial silver levels in both simple and complex laboratory tests.

#### ICS - PPM

- PPM of colloidal silver needs to be understood in its entirety.
- PPM means parts per million. By definition 1 PPM is 1 milligram of silver deposited in 1 liter of water (1,000 ml).
- If one were to ingest that 1 mg. piece of silver, it would not do much good. If you were to divide that 1 mg. into 1,000,000 particles of silver, it would then have much more efficacy because it takes one particle of silver to disable 1 pathogen.
- The silver is now 1,000,000 times better than 1 piece of silver even though by definition it is still only 1 PPM.
- If one were to further divide the 1 mg piece of silver into 100,000,000 particles, it would be very beneficial indeed. And so as the silver is more finely divided the PPM by definition remains the same.
- So, what really counts is not how many PPM the silver is but how many particles the silver has been divided into.
- That is why it isn't necessary to have high PPM but it is important to divide the silver as finely as possible.
- It is not better to try to take high PPM colloidal silver but to take colloidal silver that is properly made.
- If you think more silver is necessary, just take more of better made, low PPM colloidal silver

- Basalioma (thigh, age 50)
- Nine 5 minute treatments over 6 weeks

Traditional surgical treatment scar

# Supraclaviculary Metastasis of a Malignant Teratoma on the Neck

Before first of 5 treatments
